Integrating Early Childhood Care and Education in Sri Lanka Jan 06 2021 Changes in social and family structures, gender roles, and working environments have led some countries to introduce integrated centers for early childhood care and education (ECCE) for children ages zero to five years, combining the advantages of preschools and childcare centers. ECCE services are becoming increasingly important for countries as a support system for working parents. In countries such as Sri Lanka, where female participation in the labor force is low in comparison with international standards, providing affordable childcare services could also help more mothers to enter the labor market. Responding to the needs of employees, child development centers in the plantation areas in Sri Lanka are already providing integrated childcare services for children in this age group. The increasing demand for affordable childcare services and the growing recognition of the benefits of holistic early childhood development have brought ECCE to the forefront of Sri Lanka's development agenda. Well-designed ECCE systems can improve the lives of children and families and provide significant advantages to national economies. Access to effective ECCE can equalize learning opportunities by improving school readiness and by putting children on a more equal

footing at the primary school level. These early advantages have proved to have a lasting impact, affecting both educational and earning potential in the adult years. The significant income inequalities in countries such as Sri Lanka could be addressed through investment in effective ECCE programs, and enhanced understanding of the benefits and potential long-term impacts of ECCE could help governments tailor programs to ensure maximum return on investment. This study seeks to answer the following questions: Is it more effective to provide early childcare and education services separately or in an integrated manner? Under what conditions would the provision of separate care and education services be more effective? The study provides an analysis of the ECCE environment in Sri Lanka, with recommendations for improvement within the current context. The information presented in the study is a starting point to foster the improved understanding of a complex subject area involving multiple stakeholders.

Child Protection May 22 2022 'a valuable resource book for teachers, child care workers and school administrators on preventing, identifying and handling cases of child abuse and neglect. [It includes] a unique international perspective on child protection.' Associate Professor Sandy K Wurtele, University of Colorado 'Many books stop at the what should be done, but this book goes beyond that to tell us the how. It is sound, practical and most welcomed.' Wilma Bartlett, The National Society for the Prevention of Cruelty to Children, UK Teachers and early childhood workers are the only professionals in contact with abused children for long periods of time. Although they are seldom aware of their importance, they can provide the child's best defence against abuse. Abused children exhibit identifiable behaviours and perform less well in school than their peers. Educators and caregivers can learn to observe children's development and respond to their special needs. Schools have always taken responsibility for teaching children to stay safe from traffic, fire, water and electricity. They are also in the best position for teaching children to stay safe with people. *Child Protection* is a comprehensive guide to the common forms of child abuse

and neglect. It offers practical help for the identification of child abuse and neglect and the support of the child victims and, in particular, the provision of curriculum for child protection. Freda Briggs, formerly a teacher and social worker is Professor Child Development at the University of South Australia. She is also the author of From Victim To Offender, Why My Child?, Developing Personal Safety Skills In Children With Disabilities, Keep Children Safe and Child Sexual Abuse: Confronting The Problem. Russell Hawkins is a psychologist in private practice and a senior lecturer in Psychology at the University of South Australia.

Culture and Child Development in Early Childhood Programs Oct 03 2020 Early childhood education programs are expected to provide exemplary care for all children—poor and affluent,

children of color and White children—while also adapting care to include children’s families and cultures. These two sets of expectations are often difficult for teachers and programs to meet. In this book, Carollee Howes shows how high-quality programs successfully adapt child development guidelines within cultural contexts, and why quality needs to be and can be measured in culturally specific ways. This important book: Closely examines ECE programs considered exemplary for low-income children of color. Shows how directors and teachers successfully use practices derived from their cultural communities to implement universal standards of child care. Identifies the commonalities in good early childhood programs that are shared across class, race, and ethnic communities. Offers best practices based on extensive assessments, interviews, and observations. “Will have immediate relevance for policy debates, for understanding the mechanisms of program effects, and for educators who wish to deepen their knowledge of practice.” —Robert C. Pianta, University of Virginia “I urge all higher education faculty, in-service teacher trainers, accreditation observers, researchers, text-book writers and policymakers of standards to read this book.” —From the Foreword by Louise Derman-Sparks
