**Human Rights and the Uses of History** Jun 03 2020 What are the origins of human rights? This question, rarely asked before the end of the Cold War, has in recent years become a major focus of historical and ideological strife. In this sequence of reflective and critical studies, Samuel Moyn engages with some of the leading interpreters of human rights, thinkers who have been creating a field from scratch

without due reflection on the local and temporal contexts of the stories they are telling. Having staked out his own claims about the postwar origins of human rights discourse in his acclaimed *Last Utopia*, Moyn, in this volume, takes issue with rival conceptions—including, especially, those that underlie justifications of humanitarian intervention [The Bookseller](#) Dec 30 2019 Official organ of

Public History Sep 06 2020 *Public History: A*

*Textbook of Practice* is a guide to the many challenges historians face while teaching, learning, and practicing public history. Historians can play a dynamic and essential role in contributing to public understanding of the past, and those who work in historic preservation, in museums and archives, in government agencies, as consultants, as oral historians, or who manage crowdsourcing projects need very specific skills. This book links theory and practice and provides students and practitioners with the tools to do public history in a wide range of settings. The text engages throughout with key issues such as public participation, digital tools and media, and the internationalization of public history. Part One focuses on public history sources, and offers an overview of the creation, collection, management, and preservation of public history materials (archives, material culture, oral materials, or digital sources). Chapters cover sites and institutions such as archival repositories and museums, historic buildings and structures, and different practices such as collection management, preservation (archives, objects, sounds, moving images, buildings, sites, and landscape), oral history, and genealogy. Part Two deals with the different ways in which public historians can produce historical narratives through different media (including exhibitions, film, writing, and digital tools). The last part explores the challenges and ethical issues that public historians will encounter when working with different

communities and institutions. Either in public history methods courses or as a resource for practicing public historians, this book lays the groundwork for making meaningful connections between historical sources and popular audiences.

Graham Richards takes a historical look at how the concepts of "race" and "racism" emerged within the discipline and charts the underlying premises of some famous studies in their social and political contexts. No-one is allowed to be objective in this arena, as opponents will always argue that they are not. This account is bound therefore to be controversial and excite interest whether or not readers agree with Richards' stance.

*Doing History* Aug 30 2022 Doing History bridges the gap between the way history is studied in school or as represented in the media and the way it is studied at university level. History as an academic discipline has dramatically changed in recent decades and

has been enhanced by ideas from other disciplines, the influence of postmodernism and historians' incorporation of their own reflections into their work. *Doing History* presents the ideas and debates that shape how we 'do' history today, covering arguments about the nature of historical knowledge and the function of historical writing, whether we can ever really know what happened in the past, what sources historians depend on, and the relative value of popular and academic histories. This revised edition includes new chapters on public history and activist histories. It looks at global representations of the past across the centuries, and provides up-to-date suggestions for further reading, presenting the reader with a thorough and current introduction to studying history at an academic level as well as a pathway to progress this study further. Clearly structured and accessibly written, it is an essential volume for all students embarking on the study of history.

*Computers, Visualization, and History* Oct 20 2021 This visionary and thoroughly accessible book examines how digital environments and virtual reality have altered the ways historians think and communicate ideas and how the new language of visualization transforms our understanding of the past. Drawing on familiar graphic models--maps, flow charts, museum displays, films--the author shows how images can often convey ideas and information more efficiently and accurately than words. With emerging digital technology, these images will become more sophisticated, manipulable, and multidimensional, and provide historians with new tools and environments to construct historical narratives. Moving beyond the traditional book based on linear narrative, digital scholarship based on visualization and hypertext will offer multiple perspectives, dimensions, and experiences that transform the ways historians work and people imagine and learn about history. This second edition of *Computers, Visualization, and History* features expanded coverage of such topics as sequential

narratives, 3-D modeling, simulation, and video games, as well as our theoretical understanding of space and immersive experience. The author has also added "Guidelines for Visual Composition in History" for history and social studies teachers who wish to use technology for student assignments. Also new to the second edition is a web link feature that users of the digital edition can use to enhance visualization within the text.

**Reading Papyri, Writing Ancient History** Oct 08 2020 The ancient Mediterranean world brought to us by Herodotus, Thucydides and Tacitus is one of politics, war and the power elite of Greece and Rome. There was another ancient world, in which ordinary people made a living, sold land, ran their towns and sued one another. This is the world that the papyri bring to life; this book is about how they do so. *Reading Papyri, Writing Ancient History* demonstrates how historians can put together information from scattered and often badly damaged documents to build up a picture of the society, economy and culture of the multicultural world of antiquity. Through discussion of contemporary historical work on the documents, Roger Bagnall scrutinises alternative ways of approaching these sources. He shows how the ancient historian can use the

methodologies of anthropology, comparative history and statistics alongside more traditional tools to turn these texts into questions and answers. Students and teachers of ancient history will find *Reading Papyri, Writing Ancient History* an indispensable guide to using these ancient texts in their own work.

*Agriculture in World History* Jun 27 2022 Civilization from its origins has depended on the food, fibre, and other commodities produced by farmers. In this unique exploration of the world history of agriculture, Mark B. Tauger looks at farmers, farming, and their relationships to non-farmers from the classical societies of the Mediterranean and China through to the twenty-first century.? Viewing farmers as the most important human interface between civilization and the natural world, *Agriculture in World History* examines the ways that urban societies have both exploited and supported farmers, and together have endured the environmental changes and crises that threatened food production.? Accessibly written and following a chronological structure, *Agriculture in World History* illuminates these topics through studies of farmers in numerous countries all over the world from Antiquity to the contemporary period. Key themes addressed include the impact of global warming, the role of political and social transformations, and the development of agricultural technology. In particular, the book highlights the complexities of recent decades: increased food production, declining numbers

of farmers, and environmental, economic, and political challenges to increasing food production against the demands of a growing population. This wide-ranging survey will be an indispensable text for students of world history, and for anyone interested in the historical development of the present agricultural and food crises.?

China's Sent-Down Generation Mar 25 2022 During China's Cultural Revolution, Chairman Mao Zedong's "rustication program" resettled 17 million urban youths, known as "sent downs," to the countryside for manual labor and socialist reeducation. This book, the most comprehensive study of the program to be published in either English or Chinese to date, examines the mechanisms and dynamics of state craft in China, from the rustication program's inception in 1968 to its official termination in 1980 and actual completion in the 1990s. Rustication, in the ideology of Mao's peasant-based revolution, formed a critical component of the Cultural Revolution's larger attack on bureaucrats, capitalists, the intelligentsia, and "degenerative" urban life. This book assesses the program's origins, development, organization, implementation, performance, and public administrative consequences. It was the defining experience for many Chinese born between 1949 and 1962, and many of China's contemporary leaders went through the rustication program. The author explains the lasting impact of the rustication program on

China's contemporary administrative culture, for example, showing how and why bureaucracy persisted and even grew stronger during the wrenching chaos of the Cultural Revolution. She also focuses on the special difficulties female sent-downs faced in terms of work, pressures to marry local peasants, and sexual harassment, predation, and violence. The author's parents were both sent down, and she was able to interview over fifty former sent down from around the country, something never previously accomplished. China's Sent-Down Generation demonstrates the rustication program's profound long-term consequences for China's bureaucracy, for the spread of corruption, and for the families traumatized by this authoritarian social experiment. The book will appeal to academics, graduate and undergraduate students in public administration and China studies programs, and individuals who are interested in China's Cultural Revolution era.

**Knowledge and Power** Jun 15 2021 Knowledge and Power presents and explores science not as something specifically for scientists, but as an integral part of human

civilization, and traces the development of science through different historical settings from the Middle Ages through to the Cold War. Five case studies are examined within this book: the creation of modern science by Muslims, Christians and Jews in the medieval Mediterranean; the global science of the Jesuit order in the early modern world; the relationship between "modernization" and "westernization" in Russia and Japan from the late seventeenth to the mid-nineteenth century; the role of science in the European colonization of Africa; and the rivalry in "big science" between the United States and the Soviet Union during the Cold War. Each chapter includes original documents to further the reader's understanding, and this second edition has been enhanced with a selection of new images and a new chapter on Big Science and the Superpowers during the Cold War. Since the Middle Ages, people have been working in many civilizations and cultures to advance knowledge of, and power over, the natural world. Through a combination of narrative and primary sources, Knowledge and Power provides students with an understanding of how different cultures throughout time and across the globe approached science. It is ideal for students of world history and the history of science.
