Women and Leadership Development in College Jun 23 2022 As leadership educators shift from teacher- to learner-centered environments, from hierarchical to shared responsibility for learning, and from absolute to constructed ways of knowing, a desire for new inclusive and creative pedagogies is also emerging. This text includes over 40 easy-to-follow modules related to women and leadership development crafted by experienced leadership educators and practitioners. Each module includes learning objectives, detailed instructions, and ideas for adapting the module to diverse learning spaces and audiences. Here are but a few of the critical questions that are addressed in the modules: • How do we make explicit the complexities of power in leadership and in the stories we tell ourselves about feminism and gender in leadership? • How can we interrogate and deconstruct dominant narratives and invite intersectionality? Whose voices are missing or silenced in content and process? • What practices build leadership efficacy and habits of critical self-reflection? • What are the effects of stereotypes, prejudice and discrimination in leadership? • How are learning and leadership both individual and collective processes? • How do we develop critical consciousness and maintain hope in the face of the long arc of structural change? This text is a detailed resource for anyone interested in women and leadership education, whether through a full-length course, a weekend workshop, or a one-time topical session. It also serves as a companion to the book *We are the Leaders We've Been Waiting For: Women and Leadership Development in College* (Owen, 2020).

Behavioral Economics and Healthy Behaviors Dec 25 2019 The field of behavioural economics can tell us a great deal about cognitive bias and unconscious decision-making, challenging the orthodox economic model whereby consumers make rational and informed choices. But it is in the arena of health that it perhaps offers individuals and governments the most value. In this important new book, the most pernicious health issues we face today are examined through a behavioral economic lens. It provides an essential and timely overview of how this growing field of study can reframe and offer solutions to some of the biggest health issues of our age. The book opens with an overview of the core theoretical concepts, after which each chapter assesses how behavioral economic research and practice can inform public policy across a range of health issues. Including chapters on tobacco, alcohol and drug use, physical activity, dietary intake, cancer screening and sexual health, the book integrates the key insights from the field to both developed and developing nations. Also asking important ethical questions around paternalism and informed choice, this book will be essential reading for students and researchers across psychology, economics and business and management, as well as public health professionals wishing for a concise overview of the role behavioral economics can potentially play in allowing people to live healthier lives.

China's Evolving Military Strategy Sep 14 2021 Roughly once every generation, a powerful, highly influential organization within the Chinese People's Liberation Army releases a new edition of the *Science of Military Strategy (SMS)*, a comprehensive and authoritative study which details the strategic approach that the Chinese military will take in the coming years in response to the threats and challenges facing China. The recent release of a new edition of SMS signals the potential for dramatic shifts in the PLA's approach to a number of strategic questions, but the book remains underutilized by many Western China analysts due to the lack of both an English translation and expert analysis to place these changes into context. *China's Evolving Military Strategy* aims to bring knowledge of these important developments to a mass audience of China watchers, policymakers, and the broader foreign policy community by providing a sector-by-sector analysis of changes in the PLA's thinking and approach from the previous edition of SMS to the present. Each chapter addresses

the implications for a different portion of the Chinese military, ranging from the air, sea, and space domains to cyberspace and electromagnetic warfare, and each is written by one of the world's foremost experts on that subsection of China's military development. China's Evolving Military Strategy will serve as the cornerstone reference for a generation to come on one of China's most important declarations of its military-strategic goals and intentions.

A Comparative Study on the Translation of Detective Stories from a Systemic Functional Perspective Jun 11 2021 This book presents a corpus-based

investigation of verbal projection in detective stories and their translations. Adopting both diachronic and synchronic approaches to compare two different Chinese translations, the book is one of the first attempts to conduct a comprehensive lexico-grammatical, logico-semantic and rhetorical, as well as contextual analysis of verbal projection in the Chinese context, especially the classical Chinese language context. Further, it studies the differences and similarities of different translators' choices from both diachronic and synchronic perspectives. Given its scope, the book is relevant for all those interested in functional linguistics, translation studies and detective stories.
