Rough Draft Math Jun 18 2019 "Most upper-elementary, middle, and secondary students talk to perform right answers in math class, meaning most older students hardly talk at all in math class and don't learn much math because we talk to learn. In Rough Draft Math, Amanda Jansen shares the power of infusing math class with the spirit of revision. She shares the work she and teacher-collaborators have done to teach students how to share their rough ideas, knowing they can change them later"--

Random Destiny: How the Vietnam War Draft Lottery Shaped a Generation Aug 01 2020 This book provides a concise but thorough summary of how the selective service system worked from 1965 through 1973, and also demonstrates how this selective process, during a highly unpopular war, steered major life choices of millions of young men seeking deferrals based on education, occupation, marital and family status, sexual orientation, and more. This book explains each category of deferral and its resulting "ripple effect" across society. Putting a human face on these sociological trends, the book also includes a number of brief personal anecdotes from men in each category, told from a remove of 40 years or more, when the lifelong effects of youthful decisions prompted by the draft have become evident. There are few books which address the military draft of the Vietnam years, most notably CHANCE AND CIRCUMSTANCE: The Draft, the War and the Vietnam Generation, by Baskir and Strauss (1978). This early study of draft-age men discusses how they were socially channeled by the selective service system. RANDOM DESTINY follows up on this premise and draws from numerous later studies of men in the lottery pool, to create the definitive portrait of the draft and its long-term personal and social effects. RANDOM DESTINY presents an in-depth explanation of the selective service system in its final years. It also provides a comprehensive yet personal portrait of how the draft and the lottery steered a generation of young lives into many different paths, from combat to conscientious objection, from teaching to prison, from the pulpit to the Canadian border, from public health to gay liberation. It is the only recent book which demonstrates how American military conscription, in the time of an unpopular war, profoundly influenced a generation and a society over the decades that followed.

Strengthening OLAF, the European Anti-Fraud Office Jan 26 2020 OLAF (the European Anti-Fraud Office) was established by the Commission in 1999, following the collapse of its predecessor UCLAF, and its role is to protect the financial interests of the EU and to fight fraud and corruption within the EU's institutions or within individual EU member states. Its efficiency and effectiveness are currently under review, and the Commission has brought forward a proposal designed to improve OLAF's operational efficiency, improve information flows and protect the rights of individuals under investigation. The Committee's report judges that this proposal is premature and unlikely to enhance OLAF's accountability or independence. It also notes that the future of OLAF has become entwined with the debate over the post of European Public Prosecutor, and that the Commission should not allow this to distract its focus from examining how OLAF can be made more effective in the fight against fraud.

The Papers of Thomas Jefferson, Volume 1 Mar 28 2020 "The Papers of Thomas Jefferson is a projected

60-volume series containing not only the 18,000 letters written by Jefferson but also, in full or in summary, the more than 25,000 letters written to him. Including documents of historical significance as well as private notes not closely examined until their publication in the Papers, this series is an unmatched source of scholarship on the nation's third president"--Publisher's description.

A Factual Assessment of the Draft Common Frame of Reference Jun 30 2020 This book contains a case-based assessment of the Draft Common Frame of Reference carried out by the Common Core Evaluating Group, which gathers a number of well-established and younger scholars coming from Eastern and Western countries of the European Union using the working method of the research project "The Common Core of European Private Law" ([www.common-core.org](http://www.common-core.org)). The aim of the assessment is to test how the Draft Common Frame of Reference could work when applied in different national legal systems. To this end, a number of factual situations, i.e. hypothetical cases, have been drafted by the authors and solved through the application of both national rules and rules of the DCFR. Thereby, similarities and differences in the outcome of the cases have been analysed, together with difficulties - if any - in the application of the "Principles of European Law". The Common Core assessment has been carried out as part of the "Joint Network of European Private Law" Project (CoPECL), financed by the EU Commission.
