Advanced Problems in Mathematics: Preparing for University Feb 09 2021 This book is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge colleges as the basis for conditional offers. They are also used by Warwick University, and many other mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. Advanced Problems in Mathematics is recommended as preparation for any undergraduate mathematics course, even for students who do not plan to take the Sixth Term Examination Paper. The questions analysed in this book are all based on recent STEP questions selected to address the syllabus for Papers I and II, which is the A-level core (i.e. C1 to C4) with a few additions. Each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anybody interested in advanced mathematics.

Exams, Tests, Revision Pocketbook Oct 27 2019 Teaching exam classes carries a weight of responsibility for all teachers. They know that offering their students the best possible education is not about the narrow diet of 'teaching to the test', they also know that good test scores and excellent exam results are fundamental. So how do teachers equip their pupils for exam success while at the same time ensuring high standards of teaching and learning? The Exams, Tests, Revision Pocketbook looks at how to do just that. Rooted firmly in experience and research, this is a practical 'how to' Pocketbook aimed at classroom teachers. It provides strategies, activities and techniques for successfully teaching examination classes. Whether those are related to: using time efficiently, cognitive psychology and motivation theory, unpicking great exam technique or exploring the best use of past papers, mark schemes and examiners' reports, they are always accessible and can be readily imported for immediate classroom application. The Pocketbook is highly illustrated. Cartoons, diagrams and visual prompts support the text and cement the ideas.

100 Ideas for Secondary Teachers: Interventions May 03 2020 100 Ideas for Secondary
Teachers: Interventions focuses on low-effort, high-impact interventions that can be used at
Key Stages 3 to 5. It includes tips for improving academic performance, ways of raising
standards of teaching and learning, and plans for promoting a rich culture for learning and
high expectations. This dip-in-and-out guide shares a wide range of practical and
manageable solutions to improve interventions in the classroom. As a teacher you are
pushed every year to improve the results of your learners but no one ever really tells you
how to do it! Regrettably, there are no quick fixes or silver bullets to unlocking the potential
of students and this can be challenging at the best of times. However, assistant headteacher
Laura O'Leary presents 100 ideas, techniques and activities for effective interventions that
can be used throughout the school year to raise attainment and improve the progress of
every student. This invaluable resource focuses on specific areas for intervention including
common barriers to achievement, such as behaviour, attendance and organisational skills,
supporting key cohorts (pupil premium and students with SEND and EAL), and literacy and
numeracy skills. There are even ideas for ensuring that students are revision and exam
ready. 100 Ideas for Secondary Teachers: Interventions is ideal for all secondary teachers,

leaders, SENCOs and teaching assistants who wish to plan effective interventions that will enable young people to succeed.
