*Advanced Process Biotechnology* Oct 23 2019 Process biotechnology practice has advanced substantially in recent years. Advances have taken place not only with microbes or microbial systems, but also with mammalian, animal and plant cell culture systems. In order to recognise and protect these advances various new patents have been applied for and granted. Thus, this book deals with the patenting of new biotechnologies, as well as the actual processes themselves. Prof. Mukhopadhyay has put together an excellent collection of papers discussing the latest developments across diverse fields of biosystems. His book will serve academics, students and postgraduates of biology, biochemistry and biological engineering, and will also appeal to professionals in the bioprocessing and biotechnology industry.

Advanced Elasticsearch 7. 0 Aug 25 2022 Master the intricacies of Elasticsearch 7.0 and use it to create flexible and scalable search solutions Key Features Master the latest distributed

search and analytics capabilities of Elasticsearch 7.0 Perform searching, indexing, and aggregation of your data at scale Discover tips and techniques for speeding up your search query performance Book Description Building enterprise-grade distributed applications and executing systematic search operations call for a strong understanding of Elasticsearch and expertise in using its core APIs and latest features. This book will help you master the advanced functionalities of Elasticsearch and understand how you can develop a sophisticated, real-time search engine confidently. In addition to this, you'll also learn to run machine learning jobs in Elasticsearch to speed up routine tasks. You'll get started by learning to use Elasticsearch features on Hadoop and Spark and make search results faster, thereby improving the speed of query results and enhancing the customer experience. You'll then get up to speed with performing analytics by building a metrics pipeline, defining queries, and using Kibana for intuitive visualizations that help provide decision-makers with better insights. The book will later guide you through using Logstash with examples to collect, parse, and enrich logs before indexing them in Elasticsearch. By the end of this book, you will have comprehensive knowledge of advanced topics such as Apache Spark support, machine learning using Elasticsearch and scikit-learn, and real-time analytics, along with the expertise you need to increase business productivity, perform analytics, and get the very best out of Elasticsearch. What you will learn Pre-process documents before indexing in ingest pipelines Learn how to model your data in the real world Get to grips with using Elasticsearch for exploratory data analysis Understand how to build analytics and RESTful services Use Kibana, Logstash, and Beats for dashboard applications Get up to speed with Spark and Elasticsearch for real-time analytics Explore the basics of Spring Data Elasticsearch, and understand how to index, search, and query in a Spring application Who this book is for This book is for Elasticsearch developers and data engineers who want to take their basic knowledge of Elasticsearch to the next level and use it to build enterprise-grade distributed search applications. Prior experience of working with Elasticsearch will be useful to get the most out of this book.

Unix Advanced Mar 08 2021 If you've mastered the flavors, commands, and technical jargon surrounding Unix, are comfortable working from within the command line, and are now itching to take your Unix skills to the next level, this is the place to start! Using a task-based teaching style and easy visual approach, author Chris Herborth does more than just enumerate commands here. In these pages, he shows you how to combine and synthesize those commands to take full advantage of all of Unix's functionality. The focus here is on Unix security, networking, and system administration. By the time you reach the end of this volume, you'll be solving problems and administering systems competently--in short, tapping all of Unix's power.
