I Learn from Children Jul 19 2021 The memoir of an innovative American educator and the remarkable school she built—"a lucid presentation of what progressive education can accomplish" (The New York Times). Over a century ago, American educator Caroline Pratt created an innovative school that fosters creativity and independent thought by asking the provocative question: "Was it unreasonable to try to fit the school to the child, rather than . . . the child to the school?" A strong-willed small-town schoolteacher who ran a one-room schoolhouse by the time she was seventeen, Pratt came to viscerally reject the teaching methods of her day, which often featured a long-winded teacher at the front of the room and rows of miserable children sitting on benches nailed to the floor. In this "persuasive presentation of progressive education," Pratt recounts how she founded what is now the dynamic City and Country School in New York City, invented the "unit blocks" that have become a staple in classrooms around the globe, and played an important role in reimagining preschool and primary-school education in ways that are essential for the tumultuously creative time we live in today (Kirkus Reviews).

A Director's Guide to Corporate Financial Reporting Apr 03 2020 This book is designed for corporate directors and senior executives who want to gain a better understanding of accounting. Susan Marcus Bends the Rules Oct 29 2019 You wouldn't even know there was a war on, thinks Susan Marcus as she surveys her new neighborhood in Clayton, Missouri. There are no air raid wardens, no blackout curtains. It's so different from her old home in New York City: no

tall apartment buildings, no bustling city streets. Susan can barely understand people, their accents are so thick, and of course everyone in Clayton is a St. Louis Cardinals fan and sworn enemy of Susan's beloved New York Yankees. Worst of all, for the first time in her life, ten-year-old Susan encounters prejudice -- against New Yorkers, Jews, blacks, and the Japanese. She must be circumspect about her friendship with Loretta (the daughter of the black janitor), for Jim Crow laws still exist in 1943 Missouri. Outraged, Susan decides to strike a blow against them. She's not going to break the rules exactly; she's just going to bend them.

Japan's Hidden Hot Springs Dec 12 2020 Complete with maps and extensive advice, this guide to Japan's hot springs is an invaluable resource for anyone travelling to Japan. Easier to get to than many might imagine, Japan's hidden hot springs are among the few remaining repositories of ancient Japanese ambiance and sensibility. Bucolic and charming, they bear little resemblance to the sterile, clinic-like spas of the West or to the concrete jungles of Japan's best-known onsen towns. The hot springs introduced here belong to another time but they are disappearing fast. Discover them before it's too late through this selective, personalized, and authoritative guide. In this spa guide are unbelievable gems that you would otherwise never, ever, find by yourself. Japanese people are often shocked that you found such a place. It's a very concise collection of the "true and traditional" Japanese onsen ryokan. It is for anyone who seeks a traditional experience of what onsen used to be before modernization set in.

This fourth volume features women born between 1872 and 1900 whose stories explore a comparatively untapped era in Mormon history. This generation of Latter-day Saint women experienced firsthand the challenges of the Mexican Revolution, World War I, and World War II. They also witnessed the unprecedented global expansion of the Church and the first young women to serve as proselytizing missionaries. You will become reacquainted not only with such well-known figures as general Relief Society president Belle S. Spafford and Camilla Eyring Kimball, wife of President Spencer W. Kimball, but will also meet Kasimira Viktoria Cwiklinski Wurscher, who led the Relief Society in communist East Germany for more than twenty years; Edith Papworth Weenig Tanner, a British spy during World War I; and Maria Guadalupe Monroy Mera, who endured deep persecution, including the martyrdom of her brother, for her family's acceptance of the restored gospel in Mexico. The History Teacher Aug 20 2021 How do you know what you know is true? During the blizzard of 1978, a woman is discovered face down at the edge of her Delaware estate, a boxer, half-dead, by her side. Nearby, in a deep ravine, a CIA officer lies buried under two feet of snow. Their secret meeting--sabotaged. When Emma Quinn gets a call in her Manhattan apartment--your grandmother, out walking her dog, found dead in the snow--she has no reason to suspect foul play. A history professor at Columbia and the sole heir to the Quinn fortune, she heads down to Delaware, where her grandmother's death has triggered a series of unsettling events--a break-in at the estate, an unexpected visit from the CIA and the discovery of a disturbing collection of news clippings in an upstairs study--about hijackings, bombings and acts of terror. Back in Manhattan, Emma is being followed by a mysterious stranger. Her distress grows when she meets a well-known historian, a Scotsman and Sovietologist named Angus McLearn, who accuses her late grandfather of wrongdoing during the 1930s and '40s. Determined to clear her grandfather's name and to understand her grandmother's fate, Emma forms an uneasy alliance with McLearn. Together, they head deeper into an intrigue that harks back to the beginnings of the Cold War and the early days of the intelligence community. As Emma's research and the CIA's investigation into the death of their agent begin to intersect, she no longer knows who or what to believe. And it soon becomes apparent that this isn't just about something that happened in the 1940s. It's about an operation that is still in play in 1978, one that puts Emma--and the broader world--at risk. When a discovery leads her to her family's remote Adirondack cabin, the stranger follows. There, Emma is forced to confront the truth--about her family and about history as we know it.

Ocean Acidification Mar 15 2021 The ocean has absorbed a significant portion of all human-made carbon dioxide emissions. This benefits human society by moderating the rate of climate change, but also causes unprecedented changes to ocean chemistry. Carbon dioxide taken up by the ocean decreases the pH of the water and leads to a suite of chemical changes collectively known as ocean acidification. The long term consequences of ocean acidification are not known, but are expected to result in changes to many ecosystems and the services they provide to society. *Ocean Acidification: A National Strategy to Meet the Challenges of a Changing Ocean* reviews the current state of knowledge, explores gaps in understanding, and identifies several key findings. Like climate change, ocean acidification is a growing global problem that will intensify with continued CO2 emissions and has the potential to change marine ecosystems and affect benefits to society. The federal government has

taken positive initial steps by developing a national ocean acidification program, but more information is needed to fully understand and address the threat that ocean acidification may pose to marine ecosystems and the services they provide. In addition, a global observation network of chemical and biological sensors is needed to monitor changes in ocean conditions attributable to acidification.

Chemistry and Biology of Hyaluronan Dec 24 2021 It was probably the French chemist Portes, who first reported in 1880 that the mucin in the vitreous body, which he named hyalomucine, behaved differently from other mucoids in cornea and cartilage. Fifty four years later Karl Meyer isolated a new polysaccharide from the vitreous, which he named hyaluronic acid. Today its official name is hyaluronan, and modern-day research on this polysaccharide continues to grow. Expertly written by leading scientists in the field, this book provides readers with a broad, yet detailed review of the chemistry of hyaluronan, and the role it plays in human biology and pathology. Twenty-seven chapters present a sequence leading from the chemistry and biochemistry of hyaluronan, followed by its role in various pathological conditions, to modified hyaluronans as potential therapeutic agents and finally to the functional, structural and biological properties of hyaluronidases. Chemistry and Biology of Hyaluronan covers the many interesting facets of this fascinating molecule, and all chapters are intended to reach the wider research community. Comprehensive look at the chemistry and biology of hyaluronans Essential to Chemists, Biochemists and Medical researchers Broad yet detailed review of this rapidly growing research area

Keats's Boyish Imagination Jan 13 2021 For many readers, John Keats's achievement is to have attained a supreme poetic maturity at so young an age. Canonical poems of resignation and acceptance such as 'To Autumn' are traditionally seen as examples par excellence of this maturity. In this highly innovative study, however, Marggraf Turley examines how, for Keats, an insistence on 'boyishness' in the midst of apparent mature imagery is the very essence of his political contestation of the literary establishment.

The Forest Lover Jan 01 2020 In her acclaimed novels, Susan Vreeland has given us portraits of painting and life that are as dazzling as their artistic subjects. Now, in *The Forest Lover*, she traces the courageous life and career of Emily Carr, who—more than Georgia O'Keeffe or Frida Kahlo—blazed a path for modern women artists. Overcoming the confines of Victorian culture, Carr became a major force in modern art by capturing an untamed British Columbia and its indigenous peoples just before industrialization changed them forever. From illegal potlatches in

tribal communities to artists' studios in pre-World War I Paris, Vreeland tells her story with gusto and suspense, giving us a glorious novel that will appeal to lovers of art, native cultures, and lush historical fiction.
