The Forms and Procedure in Civil Causes in the Sheriff Courts of Scotland Dec 12 2020

Criminal Justice in Scotland Jul 19 2021 Published in 1999. Scottish criminal law and procedure are very different from their counterparts elsewhere in the United Kingdom. This book is the first socio-legal account of the Scottish criminal justice process and its constituent institutions. Its aims are: to explain the operation of the various elements which make up the 'system'; to summarise the considerable volume of relevant Scottish research; and to locate this knowledge within contemporary theorising about criminal justice. To this end, the editors commissioned a team of experts to write chapters on the various stages of institutions of the Scottish criminal justice process. Given Scotland's broad social and cultural similarities to the rest of the United Kingdom, the book also provides a useful comparative perspective which should help to discourage the tendency towards overly ethnocentric theorising south of the border.

Police Courts in Nineteenth-Century Scotland, Volume 1 Nov 10 2020 Taking the form of two companion volumes, Police Courts in Nineteenth-Century Scotland represents the first major investigation into the administration, experience, impact and representation of summary justice in Scottish towns, c.1800 to 1892. Each volume explores diverse, but complementary, themes relating to judicial practices, relationships, experiences and discourses through the lens of the same subject matter: the police court. Volume 1, with the subtitle Magistrates, Media and the Masses, provides an institutional, social and cultural history of the establishment, development and practice of police courts. It explores their rise, purpose and internal workings, and how justice was administered and experienced by those who attended them in a variety of roles. Special attention is given to examining how courtroom discourse was represented in print culture, the role of the media in providing a discursive commentary on summary justice, and the ways in which magistrates and the police engaged in a law and order dialogue with the press. Throughout, consideration is given to uncovering the relationship between magistrates, the courts, the police and the wider community, and to charting the implications of the rise of summary justice and the 'police-man' state for the urban masses (as evidenced through prosecution, conviction and punishment patterns). Volume 2, with the subtitle Boundaries, Behaviours and Bodies, explores, through themed case studies, how police courts shaped conceptual, spatial, temporal and commercial boundaries by regulating every-day activities, pastimes and cultures.

Land Law and People in Medieval Scotland Oct 10 2020 This ambitious book, newly available in paperback, examines the encounter between Gaels and Europeans in Scotland in the central Middle Ages, offering new insights into an important period in the formation of the Scots' national identity. It is based on a close reading of the texts of several thousand charters, indentures, briefs and other written sources that record the business conducted in royal and baronial courts across the length and breadth of the medieval kingdom between 1150 and 1400. Under the broad themes of land, law and people, this book explores how the customs, laws and traditions of the native inhabitants and those of incoming settlers interacted and influenced each other. Drawing on a range of theoretical and methodological approaches, the author places her subject matter firmly within the recent historiography of the British Isles and demonstrates how the experience of Scotland was both similar to, and a distinct manifestation of, a wider process of Europeanisation.

Early Modern Political Petitioning and Public Engagement in Scotland, Britain and Scandinavia, c. 1550-1795 Jan 31 2020 This book assesses the everyday use of petitions in administrative and judicial settings and contrasts these with more assertive forms of political petitioning addressed to assemblies or rulers. A petition used to be a humble means of asking a favour, but in the early modern period, petitioning became more assertive and participative. This book shows how this contrasted to ordinary petitioning, often to the consternation of authorities. By evaluating petitioning practices in Scotland, England and Denmark, the book traces the boundaries between ordinary and adversarial petitioning and shows how non-elites could become involved in politics through petitioning. Also observed are the responses of authorities to participative petitions, including the suppression or forgetting of unwelcome petitions and consequent struggles to establish petitioning as a right rather than a privilege. Together the chapters in this book indicate the significance of collective petitioning in articulating early modern public opinion and shaping contemporary ideas about opinion at large. The chapters in this book were originally published in the journal *Parliaments, Estates & Representation*.
