Routledge Handbook of Ecotourism Jul 24 2022 This handbook presents a timely, broad-ranging, and provocative overview of the essential nature of ecotourism. The chapters will both advance the existing central themes of ecotourism and provide challenging and divergent observations that will thrust ecotourism into new areas of research, policy, and practice. The volume is arranged around four key themes: sustainability, ethics and identity, change, conflict, and consumption, and environment and learning, with a total of 28 chapters. The first section focuses on sustainability as a core ecotourism criterion, with a primary focus on some of the macro sustainability issues that have an impact on ecotourism. Foremost among these topics is the linkage to the UN's Sustainable Development Goals, which have relevance to ecotourism as one of the greenest or most responsible forms of tourism. The chapters in the second section provide a range of different topics that pull ecotourism research into new directions, including a chapter on enriching indigenous ecotourism through culturally sensitive universalism. The third section includes chapters on topics ranging from persons with disabilities as a neglected body of research in ecotourism, to ecotourism as a form of luxury consumption. The final section emphasises the link between ecotourism and learning about the natural world, including a deeply theoretical chapter on rewilding Europe. Handbook of Sustainable Development and Leisure Services Apr 09 2021 This book reviews empirical and theoretical research on sustainable development in the context of leisure management for communities. Although leading research centers are pursuing interdisciplinary research on leisure in the context of sustainable development, there are still few papers that holistically address the current challenges in this area. In addition, demographic changes have made the promotion of a healthy lifestyle essential. Doing so requires responsible behavior on the part of various stakeholders in this market. This book fills an important gap in the literature and gathers contributions from an interdisciplinary and international team of authors, whose fields of expertise include human geography, management, intersections of sustainability and leisure, behavioral psychology and tourism.

Ecotourism, NGOs and Development Apr 21 2022 Ecotourism has emerged over the last twenty years not just as a market niche, but also as a strategy for combining development with conservation in the developing world. Ecotourism, NGOs and Development considers the basis for advocacy and argues that it is premised upon a very limited and limiting view of the potential for development. Jim Butcher examines the advocacy of tourism as sustainable development in a range of NGOs and within the general literature. The research reveals that in spite of the plethora of critical commentaries on the operation of ecotourism projects, there is generally an uncritical take on the ideological basis of the projects. This book offers a timely critique of key assumptions underlying ecotourism's status as sustainable development, arguing that ecotourism as development strategy ties the fate of some of

the poorest people on the planet to localized environmental imperatives.

The Routledge Handbook of Tourism and the Environment Aug 25 2022 This handbook explores and critically evaluates the debates and controversies inherent to tourism's relationship with nature, especially pertinent at a time of major re-evaluation of our relationship with the environment as a consequence of the environmental problems we now face.

Mediterranean Protected Areas in the Era of Overtourism May 30 2020 This book comprises studies that reflect on various influences of excessive tourism development in protected areas, and solutions designed and initiated to mitigate such challenges. A large proportion of tourism in Mediterranean destinations constitutes nature-based tourism, in particular, tourism in parks and protected areas. As a destination experiences higher intensity and density of tourism, the potential conflict between maintaining a healthy natural environment and economic development also increases. This has urged planners and decision-makers to devise and adopt innovative approaches that seek to strike a balance between tourism development and nature conservation. This book demonstrates the importance of collaboration across and beyond disciplines and of all groups of stakeholders for maximization of societal impacts and tourism-related benefits.

The impacts of ecotourism tend to be concentrated in areas of highest conservation value, hence the need to manage and minimize these. The book considers impacts of particular activities, such as hiking and camping, off-road vehicles, and recreational boats, and impacts specific to certain ecosystems (e.g. marine environments, polar coasts, mountain environments.) It incorporates reviews of better-studied impacts by well-known experts; and case studies of recent research and less well-known issues.

Environment and Tourism Dec 25 2019 For many people, holidays are an increasingly central feature of contemporary western society. The tourism industry has expanded rapidly since 1950, but this book poses the significant question of consequent environmental impacts: are environments being benefited or damaged, by the tourist who visit them? A well-balanced introductory text, this topical book on the relationships between tourism, society and the environment, examines 'tourism' and 'environment' in detail, and gives a historical overview of the growth of the tourism industry. It discusses how the tourism industry markets physical and cultural environments to be consumed by the tourist, and the consequences of the tourism they then attract. It explores: * how the economics of tourism can be adopted in a positive way to aid conservation * whether the concept of sustainability can be applied to tourism * provides a critique of the 'new' forms of tourism, that have developed in recent years. An extensive range of international case studies from both the developed and developing world are used to illustrate the theoretical ideas presented, and to aid the student, it includes end of chapter summaries, further reading guides and boxed vignettes focusing on contemporary environmental issues and debates.

The Routledge Handbook of Community Based Tourism Management Jan 18 2022 This Handbook offers an up-to-date and comprehensive overview of core themes and concepts in community-based tourism management. Providing interdisciplinary insights from leading international scholars, this is the first book to critically examine the current status of community-based tourism. Organised into five parts, the Handbook provides cutting-edge perspectives on issues such as Indigenous communities, tourism and the environment, sustainability, and the impact of digital communities. Part 1 introduces core concepts and methodologies, and distinguishes community products from other tourism and hospitality goods. Part 2 explores communities' attitudes towards tourism development and their engagement with and ownership of the process. It also delves into the role of community-based tourism, under the influence of governmental policies, in the economic and social development of a region. In Part 3 various management, marketing, and branding initiatives are identified as a means of expanding the tourism business. Part 4 examines the negative impacts of mass tourism and its threats to culture, tradition, identity, the built environment, and natural heritage. In the final and fifth part, future challenges and opportunities for community-based tourism initiatives are considered, and research-based sustainable solutions are proposed. Overall, the book considers engaging local populations in tourism development as a way of building stronger and more resilient communities. This Handbook fills a void in the current research and thus will appeal to scholars, students, and practitioners interested in tourism management, tourism geography, business studies, development policy and practice, regional development, conservation, and sustainability.

Ecotourism's Promise and Peril Feb 25 2020 Intended as a guide for wildlife managers and ecotourism operators, as well as interested ecotourists,

this book addresses the biological principles governing how ecotourism affects wildlife. The introductory chapters focus on four key responses to human visitation—behavioral, physiological, ecological, and evolutionary. Readers will discover ecotourism's effects on biodiversity in connection with various industries that are habitat or taxonomically specific: fish tourism (including both freshwater and marine), marine mammal tourism, the huge industry centered on terrestrial animals, and the well-studied industry of penguin tourism. Given that the costs and benefits of ecotourism cannot be meaningfully assessed without understanding the human context, particular attention is given to how ecotourism has been used as part of community development. In closing, the book synthesizes the current state of knowledge regarding best practices for reducing human impacts on wildlife. The final chapter highlights key research questions that must be addressed to provide more evidence-based guidelines and policy.

Ecotourism Sep 21 2019 This book reflects contemporary developments in the field. Building on the strengths of the first edition, the text discusses the significance of ecotourism in the domestic and international tourism sectors. The origins, markets, venues and impact of ecotourism form the basis of the first part of the book. Business aspects of ecotourism, external environments, organisations and policies are examined in the second part of the book, along with special environments, such as islands, polar regions and indigenous territories, and distinctive activities, such as whale-watching and penguin-watching. The management of ecotourism is covered comprehensively and is illustrated by extensive industry and destination examples derived mainly from the peer-reviewed literature. A highlight of the book is a regional survey of ecotourism that offers comparative insights into ecotourism in Australia, the South Pacific, Asia, Europe, the Americas and Africa.

Overbooked Nov 23 2019 "Travel is no longer a past-time but a colossal industry, arguably one of the biggest in the world and second only to oil in importance for many poor countries. One out of 12 people in the world are employed by the tourism industry which contributes \$6.5 trillion to the world's economy. To investigate the size and effect of this new industry, Elizabeth Becker traveled the globe. She speaks to the Minister of Tourism of Zambia who thinks licensing foreigners to kill wild animals is a good way to make money and then to a Zambian travel guide who takes her to see the rare endangered sable antelope. She travels to Venice where community groups are fighting to stop the tourism industry from pushing them out of their homes, to France where officials have made tourism their number one industry to save their cultural heritage; and on cruises speaking to waiters who earn \$60 a month--then on to Miami to interview their CEO. Becker's sharp depiction reveals travel as a product; nations as stewards. Seeing the tourism industry from the inside out, the world offers a dizzying range of travel options but very few quiet getaways"--

Ecotourism in Sub-Saharan Africa Mar 08 2021 Since its first mention in the academic literature, ecotourism has been endorsed by NGOs and governments as the most environmentally sound and locally beneficial method of tourist development. Over the last thirty years sub-Saharan Africa has adopted ecotourism as the primary focus for tourism development; research into this has demonstrated mixed results. In this publication, we seek to

explore the actual outcomes for African countries that have developed their tourism policy around the principals and values of ecotourism. The sheer scope and magnitude of the task means that a complete evaluation of ecotourism in Africa is impossible. Instead, included here are spot assessments of various aspects of ecotourism related to conservation, policy development, environment, governance, community and indigenous peoples in southern Africa. The studies cover a wide array of countries, including Botswana, Kenya, Tanzania, Uganda, Ghana, Zimbabwe, and South Africa. Though this is only the beginning of a needed long term evaluation of the positives and negatives of ecotourism, it provides a starting point from which to move forward. This book was originally published as a special issue of the *Journal of Ecotourism*.

The case studies from the countries of Spain, Portugal, Australia, Dubai, Bangladesh, Nigeria, and India demonstrate the uses of various management strategies and methods for rural and urban areas, and cover some of the major topics related to community-based tourism, community capacity building, and community participation in developing heritage tourism. Scientific Tourism Aug 21 2019 As researchers in emerging economies, scientists are often the first foreign visitors to stay in remote rural areas and, on occasion, form joint venture ecotourism and community tourism projects or poverty alleviation schemes between local agencies or NGOs, the local community, and their home institution or agency. They therefore can contribute to avenues for the conservation of natural resources and the development of rural communities as well as influencing the future tourism development through its perceived legitimacy and the destination image it promotes. This book for the first time critically reviews tourism debates surrounding this emerging market of scientific and research oriented tourism. It is divided into three inter-related sections. Section 1 sets the stage of the discourse of scientific research in tourism; Section 2 evaluates the key players of scientific tourism looking particularly at the roles of NGOs, government agencies and university academic staff and Section 3 contains case studies documenting the niche of researchers as travelers in a range of geographical locations including Tanzania, Australia, Chile, Peru and Mexico. The title's multidisciplinary approach provides an informed, interesting and stimulating addition to the existing limited literature and raises many issues and associated questions including the role of science tourism in tourism development and expansion, the impacts of scientific and research-based tourism, travel behaviors and motivations of researchers to name but a few. This significant volume will provide the reader with a better understanding of scientists as travelers, their relationship to the tourism industry, and the role they play in community development around tourism sites. It will be valuable reading for students and academics across the fields of Tourism, Geography and Development Studies as well as other social science disciplines.

Handbook of Research on the Role of Tourism in Achieving Sustainable Development Goals Dec 05 2020 Tourism, one of the world's leading

industries, has propelled countries into recovery from economic recession. As a multi-disciplinary, multi-sectoral, holistic, and systemic industry, tourism also uniquely placed to address the concerns of the United Nations' Sustainable Development Goals (SDGs). While the relationships between tourism, sustainability, and sustainable development are the subjects of deep study, the direct positive effects of tourism on SDGs remain underdiscussed. The Handbook of Research on the Role of Tourism in Achieving Sustainable Development Goals is a collection of innovative research that explores sustainable practices within the tourism industry. Political Ecology and Tourism Jun 11 2021 Political ecology explicitly addresses the relations between the social and the natural, arguing that social and environmental conditions are deeply and inextricably linked. Its emphasis on the material state of nature as the outcome of political processes, as well as the construction and understanding of nature itself as political is greatly relevant to tourism. Very few tourism scholars have used political ecology as a lens to examine tourism-centric natural resource management issues. This book brings together experts in the field, with a foreword from Piers Blaikie, to provide a global exploration of the application of political ecology to tourism. It addresses the underlying issues of power, ownership, and policies that determine the ways in which tourism development decisions are made and implemented. Furthermore, contributions document the complex array of relationships between tourism stakeholders, including indigenous communities, and multiple scales of potential conflicts and compromises. This groundbreaking book covers 15 contributions organized around four cross-cutting themes of communities and livelihoods; class, representation, and power; dispossession and displacement; and, environmental justice and community empowerment. This book will be of great interest to students and scholars in tourism, geography, anthropology, sociology, environmental studies, and natural resources management.
