documents and artifacts of the ancient world with a scientist's mind and a detective's eye, Guido Majno pieces together the difficulties people faced in the effort to survive their injuries, as well as the odd, chilling, or inspiring ways in which they rose to the challenge. In asking whether the early healers might have benefited their patients, or only hastened their trip to the grave, Dr. Majno uncovered surprising answers by testing ancient prescriptions in a modern laboratory. Illustrated with hundreds of photographs, many in full color, and climaxing ten years of work, *The Healing Hand* is a spectacular

recreation of man's attempts to conquer pain and disease.

*Accounting and
Food* Aug 18 2021

The interrelations between accounting and food have been hitherto neglected at an international

level. This regret is particularly meaningful with regards to Italy, where 'Food', besides being a physiological need to satisfy, is one of the main pillars of the 'Made in Italy' Industry, and the so-called Italian life-style, which has become a part of the popular culture. Accounting and Food seeks to explore the accounting, business and financial history of some of the most prestigious Italian food producers. Moreover, given that "Food" has been at the center of production and trade throughout the history of mankind, food production and commerce will be investigated from a

the critical angles of accounting, accountants and merchants. Relatedly, the interconnected history of the Food fairs and expositions of the major Italian trade centers will be also unveiled. Accounting and Food examines the role of accounting, accountants and merchants in food production and international trade (e.g., grain, wine, etc...) as well as considering the history of food producers, paying particular attention to the role played by women entrepreneurs over time. Finally the book explores the interrelations of accounting, food and state, local authorities and

social institutions, in particular in so far these latter institutions were involved in the Political economy, regulation, allocation and distribution of food to populations and societies. Accounting and Food will be of particular interest to researches and scholars in the field of accounting history but also to those working in the areas of regional development, regional economics, food and sociology and other related disciplines.

The Socratic

Problem Nov 28

2019 This work is
intended to offer to
anyone still
intending to devote
himself to the
Socratic problem a
reliable means of
approach by
providing, first of
all, a complete
history of the
problem itself, from
its first appearance

during Socrates'
lifetime up to the
present day. The
book provides not
only the history of
the problem, but
also the essential
documents,
accompanied by
brief explanatory
and bibliographical
contextual notes, to
be read in
counterpoint with
the chapters of its
history. These
documents consist
of 61 extracts from
54 authors, from
Fréret onwards, in
other words, from
the beginning of the
history of the
problem of the
socratic sources,
which arose in the
Age of
Enlightenment,
down to the present
day. These extracts
are not intended to
form a collection of
the various
representations,

interpretations or
images of Socrates
which succeeded
each other in the
history of socratic
historiography;
instead, the aim is
to present, in a
logically and
chronologically
consistent order,
the various ways in
which the problem
of the sources of
Socratism was
presented and
resolved in the
course of two
hundred years of
study and research
on the 'case' of
Socrates.

è uno degli argomenti classici della storia economica. L'attenzione per questo tema fu particolarmente viva a partire dagli anni trenta del novecento, in tutti i paesi europei. I materiali raccolti e pubblicati a quell'epoca continuano a costituire una base documentaria importante per ogni ricerca sull'andamento economico delle economie pre-industriali. L'interesse per i prezzi si ridusse dagli anni settanta agli anni novanta. È ripreso, tuttavia, negli ultimi quindici-venti anni come conseguenza della rinnovata attenzione per il tema della crescita

e per i cambiamenti di lungo periodo nelle economie del passato. Il confronto fra i livelli di sviluppo di economie diverse, come quella europea e quella asiatica, insieme con l'uso di strumenti statistici più avanzati nel campo della storia economica, ha rafforzato l'interesse per i prezzi. I contributi presenti in questo volume si articolano intorno a due macro-temi: La formazione dei prezzi nelle economie e società pre-industriali durante i secoli dal XII all'inizio del XIX e il movimento dei prezzi nel lungo periodo, nonché il rapporto esistente con quello di altre variabili

economiche e non-economiche, quali la popolazione, la massa monetaria, il prodotto, la produttività, la velocità di circolazione della moneta, i cambiamenti nelle istituzioni.

The Antiquity of the Italian Nation

Mar 13 2021 This book explores the political uses of Italy's antique past in the early nineteenth century, tracing how anti-romanism was transformed into a pillar of the nation-building process. It demonstrates the pivotal role played by this ancient heritage in the formation of modern Italian national identity.

The Origins of Accounting Culture

Oct 08 2020 The Origins Of Accounting Culture aim at studying the origins

of the accounting culture in Venice, with a specific focus on accounting education. The period covered by the work ranges from Luca Pacioli to the foundation (in 1868) of the Royal Advanced School of Commerce (Regia Scuola Superiore di Commercio), that in 2018 is celebrating its 150 anniversary as Ca' Foscari University of Venice. Ever since the Middle Ages, Venice was home of a number of favourable circumstances that have been accumulating over the years. As a trading city par excellence, Venice allowed the spreading of the bookkeeping at first among firms and then in the public

administration that was much in need of sophisticated accounting principles for the purpose of controlling its activities. Venice was among the first cities to implement Gutenberg print method and it quickly became the most important city in the world in the publishing industry, allowing printing and spreading the first handbooks about double-entry bookkeeping and merchant studies. *The Origins Of Accounting Culture* goes beyond the study of Luca Pacioli and tackles in a more organic and holistic way the social and economic conditions that allowed the accounting culture to spread in Venice.

This book will be a vital resource to academics and researchers in the fields of Accounting, Accounting History, Economic Development and related disciplines. *The Evolution of Corporate Disclosure* Mar 01 2020 This book provides a critical analysis of the evolution of corporate disclosure. Building upon prior academic literature, it assesses the most important changes in mandatory corporate disclosure, the growing relevance of social and environmental disclosure, and revolutionary new forms of corporate communication, in particular social

media. It also includes empirical analyses that shed further light on the impact of voluntary communication, i.e. social and environmental reporting and corporate social media communication, on managerial and investment decisions. Lastly, it discusses new directions for accounting and corporate governance research on the theoretical and empirical challenges of corporate disclosure. Offering a wealth of relevant and timely advice, the book will help regulators design policies that allow businesses to overcome current and emerging

economic, social, and technological challenges.
La regina e i suoi amanti Dec 22 2021
Un titolo elisabettiano (ne ebbe di amanti la Regina Vergine) per un tentativo di rotta, di circumnavigazione di un mondo così tondo da prevedere ogni tipo di situazioni, ogni gioco di contrasti: la gloria e la vergogna, l'arroganza e l'umiltà, il martirio e la joie de vivre, l'ascesa e la caduta, il miracolo offerto da chi è stato toccato dal demone e i risultati frutto di umanissimi sforzi. Più che una storia ordinata dell'atletica, Regina di tutti gli sport, il libro di Giorgio Cimbrico propone

momenti, ricordi - di riporto e diretti -, profili di belli e dannati, capaci di lasciare il segno nello sport che li accomuna e li anticipa tutti nel repertorio delle attitudini e dei gesti, nel desiderio del confronto, nelle motivazioni che germogliano. Così, l'atletica, più che regina, diviene la smisurata strada maestra che percorre l'India: invita a percorrerla, per percorrerla dentro.

This volume proposes a rich corpus of papers about the 'Other City', a subject only few times dealt with, but worthy of all our attention: it imposes itself on the scene of international modern and contemporary historiography for its undeniable topicality. Throughout history, the city has always had to deal with social 'otherness', on

i.e. with class privileges and, consequently, with discrimination and marginalization of minorities, of the less well-off, of foreigners, in short, with the differences in status, culture, religion. So that the urban fabric has ended up structuring itself also in function of those inequalities, as well as of the strategic places for the exercise of power, of the political, military or social control, of the spaces for imprisonment, for the sanitary isolation or for the 'temporary' remedy to the catastrophes. From the first portraits of cities, made and diffused at the beginning of the fifteenth century for political

exaltation purposes or for religious propaganda and for devotional purposes, which often, through increasingly refined graphic techniques, distort or even deny the true urban image, we reach, at the dawn of contemporary history, the new meaning given by scientific topography and new methods of representation; these latter aimed at revealing the structure and the urban landscape in their objectivity, often unexpected for who had known the city through the filter of 'regime' iconography. The representation of the urban image still shows the contradictions of a community that

sometimes includes and even exalts the diversities, other times rejects them, showing the unease of a difficult integration.
