Parallel Journeys Sep 23 2019 She was a young German Jew. He was an ardent member of the Hitler Youth. This is the story of their parallel journey through World War II. Helen Waterford and Alfons Heck were born just a few miles from each other in the German Rhineland. But their lives took radically different courses: Helen's to the Auschwitz extermination camp; Alfons to a high rank in the Hitler Youth. While Helen was hiding in Amsterdam, Alfons was a fanatic believer in Hitler's "master race." While she was crammed in a cattle car bound for the death camp Aushchwitz, he was a teenage commander of frontline troops, ready to fight and die for the glory of Hitler and the Fatherland. This book tells both of their stories, side-by-side, in an overwhelming account of the nightmare that was WWII. The riveting stories of these two remarkable people must stand as a powerful lesson to us all.

Mekong Dreaming Apr 30 2020 The Mekong River has undergone vast infrastructural changes in recent years, including the construction of dams across its main stream. These projects, along with the introduction of new fish species, changing political fortunes, and international migrant labor, have all made a profound impact upon the lives of those residing on the great river. It also impacts how they dream. In Mekong Dreaming, Andrew Alan Johnson explores the changing relationship between the river and the residents of Ban Beuk, a village on the Thailand-Laos border, by focusing on the effect that construction has had on human and inhuman elements of the villagers' world. Johnson shows how inhabitants come to terms with the profound impact that remote, intangible, and yet powerful forces—from global markets and remote bureaucrats to ghosts, spirits, and gods—have on their livelihoods. Through dreams, migration, new religious practices, and new ways of dwelling on a changed river, inhabitants struggle to understand and affect the distant, the inassimilable, and the occult, which offer both sources of power and potential disaster.

A Madman Dreams of Turing Machines Jan 28 2020 Kurt Gödel's Incompleteness Theorems sent shivers through Vienna's intellectual circles and directly challenged Ludwig Wittgenstein's dominant philosophy. Alan Turing's mathematical genius helped him break the Nazi Enigma Code during WWII. Though they never met, their lives strangely mirrored one another—both were brilliant, and both met with tragic ends. Here, a mysterious narrator intertwines these parallel lives into a double helix of genius and anguish, wonderfully capturing not only two radiant, fragile minds but also the zeitgeist of the era.

Hitler and Stalin Sep 28 2022 An award-winning historian plumbs the depths of Hitler and Stalin's vicious regimes, and shows the extent to which they brutalized the world around them. Two 20th century tyrants stand apart from all the rest in terms of their ruthlessness and the degree to which they changed the world around them. Briefly allies during World War II, Adolph Hitler and Josef Stalin then tried to exterminate each other in sweeping campaigns unlike anything the modern world had ever seen, affecting soldiers and civilians alike. Millions of miles of Eastern Europe were ruined in their fight to the death, millions of lives sacrificed. Laurence Rees has met more people who had direct experience of working for Hitler and Stalin than any other historian. Using their evidence he has pieced together a compelling comparative portrait of evil, in which idealism is polluted by bloody pragmatism, and human suffering is used casually as a political tool. It's a jaw-dropping description of two regimes stripped of moral anchors and doomed to destroy each other, and those caught up in the vicious magnetism of their leadership.

[Witchcraft, Sorcery and Social Categories Among the Safwa](#) Oct 05 2020 Originally published in 1970, this book explores the role of concepts of disease in the social life of the Safwa of Tanzania, particularly through beliefs concerning witchcraft and sorcery. Examining Safwa ideas about the causation of disease and death and the use of aetiological terms in actual cases, it demonstrates a parallel between these ideas and terms, on the one hand and the Safwa system of social categories on the other. A description of the Safwa environment, way of life and social system is followed by an account of the concepts of death and disease and of their causes as revealed in ancestor rites, divination and autopsy. An analysis of case histories demonstrates that the cause assigned to a particular instance of illness or death depends upon the status relationship between disputing parties who are associated with the patient. The way in which the parallel between aetiological and social categories helps to control the outcome of disputes is also examined.

Alan Brinkley May 12 2021 Few American historians of his generation have had as much influence in both the academic and popular realms as Alan Brinkley. His debut work, the National Book Award-winning Voices of Protest, launched a storied career that considered the full spectrum of American political life. His books give serious and original treatments of populist dissent, the role of mass media, the struggles of liberalism and conservatism, and the powers and limits of the presidency. A longtime professor at Harvard University and Columbia University, Brinkley has shaped the field of U.S. history for generations of students through his textbooks and his mentorship of some of today's foremost historians. Alan Brinkley: A Life in History brings together essays on his major works and ideas, as well as personal reminiscences from leading historians and thinkers beyond the academy whom Brinkley collaborated with, befriended, and influenced.

Among the luminaries in this volume are the critic Frank Rich, the journalists Jonathan Alter and Nicholas Lemann, the biographer A. Scott Berg, and the historians Eric Foner and Elizabeth Cohen. Together, the seventeen essays that form this book chronicle the life and thought of a working historian, the development of historical scholarship in our time, and the role that history plays in our public life. At a moment when Americans are pondering the plight of their democracy, this volume offers a timely overview of a consummate student—and teacher—of the American political tradition.

Becoming Ethical Sep 16 2021 This book is a practical guide for counselors and therapists who work in the field of interventions with men who have engaged in violence or sexual abuse towards partners and family members. The book argues that intervention practices must move beyond attempts to coerce, confront, or educate a seemingly unwilling or unmotivated man. Instead, it offers respectful intervention practices, necessitating a parallel journey by the therapist, which includes: assisting men in finding an ethical basis and the means to cease abusive behavior and to develop new ways of relating * being informed by political, rather than psychological, metaphors of explanation and understanding * seeing intervention in terms of power relations and practices within families and communities, and within the institutional, statutory, and therapeutic settings in which men participate * moving to a restorative project which promotes the cessation of violence and abuse; promotes the restitution for harm done to individuals, community, and culture; and promotes a reclamation of a sense of integrity for the person who has abused. The book argues that such a parallel journey acknowledges the political nature of the intervention, which shifts the emphasis of the intervention away from an "us and them" attitude, and has a far more substantial impact in assisting clients to challenge abusive behavior, compared to other practice methods or techniques for intervention. The book is organized in five parts - with four case studies being revisited throughout, from initial engagement through to restitution and family restoration - which: detail invitational theory concerning the nature and politics of violence, resistance, and restorative practice * outline the paradigm for invitational practice, including practices for addressing restraints, establishing an ethical foundation, and addressing abusive practices * present a map with guidelines for an ethical journey, and practices for facilitating this journey in the context of an restorative project * concern invitational context within a relationship and family context * outline a collaborative invitational process for evaluation of goal attainment by men who have abused. Becoming Ethical builds on the invitational model, introduced by Alan Jenkins in his book Invitations to Responsibility (Dulwich, 1990), which has sold over 20,000 copies.

Hitler and Stalin Oct 29 2022 Forty years after his Hitler: A Study in Tyranny set a standard for scholarship of the Nazi era, Lord Alan Bullock gives readers a breathtakingly accomplished dual biography that places Adolf Hitler's origins, personality, career, and legacy alongside those of Joseph Stalin--his implacable antagonist and moral mirror image.

Working Memories Apr 11 2021 Technological developments during the Second World War led to an approach that linked ideas from computer science to neuroscience, linguistics, philosophy and psychology, known today as the Cognitive Revolution. Leaving behind traditional behaviourist approaches popular at the time, psychology began to utilise artificial intelligence and computer science to develop testable theories and design groundbreaking new experiments. The Cognitive Revolution dramatically changed the way that psychological research and studies were conducted and proposed a new way of thinking about the mind. In Working Memories, Alan Baddeley, one of the world's leading authorities on Human Memory, draws on his own personal experience of this time, recounting the radical development of a pioneering science in parallel with his own transatlantic, vibrant and distinguished career. Detailing the excitement and sometimes frustration experienced in taking psychology into the world beyond the laboratory, Working Memories presents unique insights into the mind and psychological achievements of one of the most influential psychologists of our time.

Probable Impossibilities Jul 14 2021 The acclaimed author of Einstein's Dreams tackles "big questions like the origin of the universe and the nature of consciousness ... in an entertaining and easily digestible way" (Wall Street Journal) with a collection of meditative essays on the possibilities—and impossibilities—of nothingness and infinity, and how our place in the cosmos falls somewhere in between. Can space be divided into smaller and smaller units, ad infinitum? Does space extend to larger and larger regions, on and on to infinity? Is consciousness reducible to the material brain and its neurons? What was the origin of life, and can biologists create life from scratch in the lab? Physicist and novelist Alan Lightman, whom The Washington Post has called "the poet laureate of science writers," explores these questions and more—from the anatomy of a smile to the capriciousness of memory to the specialness of life in the universe to what came before the Big Bang. Probable Impossibilities is a deeply engaged consideration of what we know of the universe, of life and the mind, and of things vastly larger and smaller than ourselves.

The President and the Provocateur Nov 25 2019 The President and the Provocateur explores the parallel lives of John F. Kennedy, born into wealth and celebrity, destined for glory and a violent death, and of Lee Harvey Oswald, born into poverty and obscurity, murdered in police custody and convicted - without a lawyer or a trial - of the killing of JFK. 50 years after both men were murdered, Alex Cox provides a chronological account of their lives' strange intersections, their shared interests, and the increasing body of evidence which suggests that Lee Harvey Oswald was working for some branch of the government - most likely the FBI or IRS - as an infiltrator of subversive groups, and agent provocateur.

Stop Looking at Your Phone Jan 20 2022 Haven't you got something better to do? Our streets are filled with down-facing zombies, blocking up the pavements. We'd rather Instagram our food than eat it. We've forgotten how to have real actual conversations. And in the bedroom... well, that's no place for Candy Crush Saga. It's time we all repeated the life-changing maxim: STOP LOOKING AT YOUR PHONE. In his wonderfully deadpan instruction manual for our increasingly tunnel-visioned lives, illustrator Son of Alan taps into the strange truth of our obsession with the tiny screen. Revealing how ludicrous we've all become, and what wonders lie in stail for us a whole metre from our faces, this book will make you want to reclaim your life, your friends and your family from the tyranny of the backlit screen. You'll laugh, sure, but it might also change your life.

How To Think Aug 23 2019 How to Think is a contrarian treatise on why we're not as good at thinking as we assume - but how recovering this lost art can rescue our inner lives from the chaos of modern life. Most of us don't want to think, writes the American essayist Alan Jacobs. Thinking is trouble. It can force us out of familiar, comforting habits, and it can complicate our relationships with like-minded friends. Finally, thinking is slow, and that's a problem when our habits of consuming information (mostly online) leave us lost in the echo chamber of social media, where speed and factionalism trump accuracy and nuance. In this clever, witty book, Jacobs diagnoses the many forces that prevent thought - forces that have only worsened in the age of Twitter, such as "alternative facts," and information overload. He also dispels the many myths we hold about what it means to think well. (For example: it's impossible to "think for yourself.") Drawing on sources as far-flung as the novelist Marilynne Robinson, the basketball legend Wilt Chamberlain, the British philosopher John Stuart Mill and the Christian theologian C.S. Lewis, Jacobs digs into the nuts and bolts of the cognitive process, offering hope that each of us can reclaim our mental lives from the whirlpool of what now passes for public debate. After all, if we can learn to think together, perhaps we can learn to live together.

Machiavelli Aug 15 2021 'A wonderfully assured and utterly riveting biography that captures not only the much-maligned Machiavelli, but also the spirit of his time and place. A monumental achievement.' – Jessie Childs, author of *God's Traitors*. 'A notorious fiend', 'generally odious', 'he seems hideous, and so he is.' Thanks to the invidious reputation of his most famous work, *The Prince*, Niccolò Machiavelli exerts a unique hold over the popular imagination. But was Machiavelli as sinister as he is often thought to be? Might he not have been an infinitely more sympathetic figure, prone to political missteps, professional failures and personal dramas? Alexander Lee reveals the man behind the myth, following him from cradle to grave, from his father's penury and the abuse he suffered at a teacher's hands, to his marriage and his many affairs (with both men and women), to his political triumphs and, ultimately, his fall from grace and exile. In doing so, Lee uncovers hitherto unobserved connections between Machiavelli's life and thought. He also reveals the world through which Machiavelli moved: from the great halls of Renaissance Florence to the court of the Borgia pope, Alexander VI, from the dungeons of the Stinche prison to the Rucellai gardens, where he would begin work on some of his last great works. As much a portrait of an age as of a uniquely engaging man, Lee's gripping and definitive biography takes the reader into Machiavelli's world – and his work – more completely than ever before.

Why Time Flies Sep 04 2020 'An insightful meditation on the curious nature of time...A highly illuminating intellectual investigation' (Kirkus Reviews) explaining the sometimes contradictory ways we experience time. "Time" is the most commonly used noun in the English language: it's always on our minds and it advances through every living moment. But what is time, exactly? Do children experience it the same way adults do? Why does it seem to slow down when we're bored and speed by as we get older? How and why does time fly? "Erudite and informative, a joy with many small treasures" (Science), this witty and meditative exploration by award-winning author and New Yorker staff writer Alan Burdick—"one of the finest science writers at work today, with an uncanny ability to explain knotty topics, with humanity, and humor" (Publishers Weekly, staff pick, best books of 2016)—takes readers on a personal quest to understand how time gets in us and why we perceive it the way we do. In the company of scientists, he visits the most accurate clock in the world (which exists only on paper); discovers that "now" actually happened a split-second ago; finds a twenty-fifth hour in the day; lives in the Arctic to lose all sense of time; and, for one fleeting moment in a neuroscientist's lab, even makes time go backward. "Why Time Flies captures us. Because it opens up a well of fascinating queries and gives us a glimpse of what has become an ever more deepening mystery for humans: the nature of time" (The New York Times Book Review). This "intellectual adventure renders a hefty topic accessible to the general public" (Richmond Times-Dispatch), is an instant classic, a vivid and intimate examination of the clocks that tick inside us all.

Mao: The Unknown Story Oct 17 2021 The most authoritative life of Mao ever written, by the bestselling author of *Wild Swans*, Jung Chang and her husband, historian Jon Halliday. Based on a decade of research, and on interviews with many of Mao's close circle in China who have never talked before, and with virtually everyone outside China who had significant dealings with him, this is the most authoritative life of Mao ever written. It is full of startling revelations, exploding the myth of the Long March, and showing a completely unknown Mao: he was not driven by idealism or ideology; his intimate and intricate relationship with Stalin went back to the 1920s, ultimately bringing him to power; he welcomed Japanese occupation of much of China; and he schemed, poisoned and blackmailed to get his way. After Mao conquered China in 1949, his secret goal was to dominate the world. In chasing this dream he caused the deaths of 38 million people in the greatest famine in history. In all, well over 70 million Chinese perished under Mao's rule, in peacetime. Combining meticulous history with the story-telling style of *Wild Swans*, this biography makes immediate Mao's roller-coaster life, as he intrigued and fought every step of the way to force through his unpopular decisions. Mao's character and the enormity of his behaviour towards his wives, mistresses and children are unveiled for the first time. This is an entirely fresh look at Mao in both content and approach. It will astonish historians and the general reader alike. 'This a bombshell of a book', Chris Patten, *The Times* 'The first great political biography of the twenty-first century'

Laugh Lines Nov 06 2020 With his tender, funny memoir of four decades in the business, one of the first writers for Saturday Night Live traces the history of American comedy. Alan Zweibel started his comedy career selling jokes for seven dollars apiece to the last of the Borscht Belt standups. Then one night, despite bombing on stage, he caught the attention of Lorne Michaels and became one of the first writers at Saturday Night Live, where he penned classic material for Gilda Radner, John Belushi, and all of the original Not Ready For Prime Time Players. From SNL, he went on to have a hand in a series of landmark shows—from *It's Garry Shandling's Show* to *Curb Your Enthusiasm*. Throughout the pages of *Laugh Lines* Zweibel weaves together his own stories and interviews with his friends and contemporaries, including Richard Lewis, Eric Idle, Bob Saget, Mike Birbiglia, Sarah Silverman, Judd Apatow, Dave Barry, Carl Reiner, and more. The book also features a charming foreword from his friend of forty-five years Billy Crystal, with whom he co-wrote and co-produced the upcoming film *Here Today* that stars Crystal and Tiffany Haddish. *Laugh Lines* is a warmhearted cultural memoir of American comedy. "In *Laugh Lines*, Zweibel looks back, affectionately and informatively, at a career that began when he was a young deli worker grinding out jokes for old-school borscht belt comedians in his spare time, and that, after his "S.N.L." years, included rewarding collaborations with, among others, Garry Shandling, Billy Crystal, Martin Short, Larry David and Dave Barry. . . . Fascinating." —New York Times "Any comedy fan will thrill to see the contemporary art's invention through the eyes of consummate funny man Alan Zweibel. He takes you behind the velvet rope and makes you weep for all those artists who made us laugh. Screamingly funny—also very moving. A classic." —Mary Karr "Alan Zweibel is legendary among us comedians. He is the man who delivers comedy with an emotional clout that makes him respected and revered." —Steve Martin

Life in the Third Reich Mar 22 2022 Essays discuss political violence, village life, public opinion of Hitler, Nazi policy against the Jews, social outcasts, and the experience of youngsters growing up in Nazi Germany

The Dictators Mar 10 2021 Half a century after their deaths, the dictatorships of Stalin and Hitler still cast a long and terrible shadow over the modern world. They were the most destructive and lethal regimes in history, murdering millions. They fought the largest and costliest war in all history. Yet millions of Germans and Russians enthusiastically supported them and the values they stood for. In this first major study of the two dictatorships side-by-side Richard Overy sets out to answer the question: How was dictatorship possible? How did they function? What was the bond that tied dictator and people so powerfully together? He paints a remarkable and vivid account of the different ways in which Stalin and Hitler rose to power, and abused and dominated their people. It is a chilling analysis of powerful ideals corrupted by the vanity of ambitious and unscrupulous men.

Mickey and Willie May 24 2022 Acclaimed sportswriter Allen Barra exposes the uncanny parallels--and lifelong friendship--between two of the greatest baseball players ever to take the field. Culturally, Mickey Mantle and Willie Mays were light-years apart. Yet they were nearly the same age and almost the same size, and they came to New York at the same time. They possessed virtually the same talents and played the same position. They were both products of generations of baseball-playing families, for whom the game was the only escape from a lifetime of brutal manual labor. Both were nearly crushed by the weight of the outsized expectations placed on them, first by their families and later by America. Both lived secret lives far different from those their fans knew. What their fans also didn't know was that the two men shared a close personal friendship--and that each was the only man who could truly understand the other's experience.

Hideki and Ray each fight their way across the island, surviving heart-pounding ambushes and dangerous traps. But then the two of them collide in the middle of the battle...
