The Katangese Gendarmes and War in Central Africa Aug 23 2019 A history of the 1960s unrecognized state 's army and their role in Central Africa 's political and military conflicts. Erik Kennes and Miles Larmer provide a history of the Katangese gendarmes and their largely undocumented role in many of the most important political and military conflicts in Central Africa. Katanga, located in today 's Democratic Republic of Congo, seceded in 1960 as Congo achieved independence, and the gendarmes fought as the unrecognized state 's army during the Congo crisis. Kennes and Larmer explain how the ex-gendarmes, then exiled in Angola, struggled to maintain their national identity and return "home." They take readers through the complex history of the Katangese and their engagement in regional conflicts and Africa 's Cold War. Kennes and Larmer show how the paths not taken at Africa 's independence persist in contemporary political and military movements and bring new understandings to the challenges that personal and collective identities pose to the relationship between African nation-states and their citizens and subjects. "A fascinating story which is tied to the colonial development of Katanga province, cold war politics in Central Africa, the crisis of the postcolonial state in the Congo, and the interregional politics in the Great Lakes area." —Georges Nzongola-Ntalaja, University of North Carolina "A major contribution to our understanding of postcolonial politics in Africa more broadly and sheds light on the survival of militias over time and forms of subnationalism emerging from regional consciousness." —M. Crawford Young, University of Wisconsin, Madison

Challenging Entrepreneurship Research Nov 06 2020 The growth of entrepreneurship research has been accompanied by an increased convergence and institutionalization of the field. In many ways this is of course positive, but it also represents how the field has become "mainstream" with the concomitant risk that individual scholars become embedded in a culture and incentive system that emphasizes and rewards incremental research questions, while reducing the incentives for scholars to conduct challenging research. This book challenges this status quo from accepted theories, methodologies and paradigmatic assumptions, to the relevance (or lack of) for contemporary practice and the impact of key journals on scholars ' directions in entrepreneurship research. An invited selection of the younger generation of scholars within the field of entrepreneurship research adopt a critical

and constructive posture on what has been achieved in entrepreneurship research, the main assumptions which underly it, but also open-up new paths for creative entrepreneurship research in the future. This is a must-read for all scholars, educators and advanced students in entrepreneurship research.
