Management Obligations for Health and Safety Aug 08 2020 In recent years, the safety management field has placed leadership and commitment at the center of effective workplace health and safety programs. At the same time, personal liability for workplace health and safety has increased, resulting in poor outcomes for individual managers. Discussing the minimum expectations that courts and tribunals have of managers, Management Obligations for Health and Safety examines the relationship between those expectations and effective safety performance. The book looks at safety management from the perspective of management obligations. What expectations are placed on managers at all levels of an organization to ensure that the workplace and systems of work are safe, and how are these expectations considered and analyzed by courts and public inquiries? As importantly, the book explores how management actions in relation to these obligations and expectations influence, positively or negatively, the safety performance of an organization. With examples drawn from legal and quasi-legal processes, one of the more enlightening and thought-provoking features of this book is the extensive use of cross examination taken from various proceedings. No one person reacts the same to finding him- or herself responsible for managing the aftermath of a death at work, or having to deal with the immediate pressure of being subject to interviews and investigation by safety regulators (much less the drawn-out experience of the legal process), but one of the most constant reactions is "Why didn't anybody tell me about this?" Stressing the importance of safety culture, this book details the true nature of the expectations that are placed on managers by virtue of their obligation to provide a safe workplace.

New Horizons in Patient Safety: Safe Communication Feb 11 2021 This

case studies book is an indispensable resource for educators, students, and practitioners of nursing. It is innovative in its application of lessons from the communication sciences to common challenges in the delivery of safe patient care. The authors apply basic tenets of human communication to the context of nursing to provide a foundation for practices that can advance the safety and quality of care. The cases, which describe "close calls" and adverse events, are organized along the continuum of healthcare delivery, providing quick access to solutions in commonly encountered care situations. Each case is accompanied by a discussion of how skillful communication can be key to preventing and recovering from errors and adverse events. Thought-provoking discussion questions and references for further reading make this book a valuable reference for nursing educators, students, and practitioners across the world.

New Shop Floor Management Jan 01 2020 In this first comprehensive departure from the time-and-motion dictums of Frederick Taylor's Shop Management that have influenced management practices for most of this century, Kiyoshi Suzaki offers a framework for successfully conducting business at its most crucial point-the shop floor. Drawing on the principles of holistic management, where organizational boundaries are smashed and co-destiny is created, Suzaki demonstrates how modern shop floor management techniques -- focusing maximum energy on the front line -- can lead to dramatic improvements in productivity and value-added-to-services. The role of management today, Suzaki argues, is to eliminate its own responsibilities by thinking of the organization from the genba, or shop floor, point of view.

In this challenge, Suzaki claims, organizations need to collect the wisdom of people by practicing "Glass Wall Management," where organizations become transparent, enabling employees to contribute maximum creativity as opposed to blocking their potential with what he calls "Brick Wall Management." Further, to empower individuals to selfmanage their work and satisfy their customers, Suzaki asserts that they all should learn to manage their own "mini-company," where everybody is considered president of his or her area of responsibility. Front-line supervisors, Suzaki shows, must develop a mission and goals and share them both up and downstream. He cites examples of the "shop floor point of view" -- McDonald's Corporation's legal staff learning how to sell hamburgers and fix milkshake machines; Honda's human resource staff training on the assembly line -- that narrow the gap between top management and the shop floor. By upgrading people's skills, focusing on empowerment, and streamlining processes, Suzaki illustrates that an organization will realize concrete improvements in quality, cost, delivery, safety, morale, and ultimately, its competitive position.

Baptism of Fire May 17 2021 A unique personal survival account of the Piper Alpha disaster, seen from inside the Control Room. The 30th anniversary of the disaster will be on 6th July 2018. There will be major media interest leading up to the anniversary, including a documentary, James Nesbitt: Disasters that changed Britain due to be shown in April 2018, one episode of which focuses upon Piper Alpha and features the author. Baptism of Fire, Life Death and Piper Alpha brings to life the dramatic events of 6th July 1988, the terrible cost in the loss of 167 lives, and the trauma experienced by those who survived. The book also includes the perspective of his family, as they watched the news unfold, and had to cope with the aftermath of the tragedy. After the disaster Geoff went on to build a very successful Financial Advice business. His story includes anecdotes from his life, work on the oil rig and a comprehensive account of the disaster. The story is one of hope and inspiration which illustrates that, whatever traumatic circumstances we might experience, life does go on and positive lessons can be learnt. It's possible to have a quality of life which seems unimaginable in the early days, months and even years following such a huge trauma, and life changing event. As Geoff says: "It was and still is the worst disaster in the offshore oil industry and that is where it needs to stay. It is a very sad record that hopefully will never be beaten."
