Right here, we have countless books The Adolescent By Gouws E Free Ebooks About The Adolescent By Gouws E Or Viewer Search Kindle And and collections to check out. We additionally have enough money variant types and then type of the books to browse. The all right book, fiction, history, novel, scientific research, as capably as various extra sorts of books are readily manageable here.

As this The Adolescent By Gouws E Free Ebooks About The Adolescent By Gouws E Or Viewer Search Kindle And, it ends occurring swine one of the favored book The Adolescent By Gouws E Free Ebooks About The Adolescent By Gouws E Or Viewer Search Kindle And collections that we have. This is why you remain in the best website to see the incredible book to have.

Benumof's Airway Management Jun 23 2019 Airway Management is one of the fundamental fields of knowledge that every resident, anesthesiologist and Nurse Anesthetist must master to successfully manage surgical patients. The new edition of this highly successful text has a new editor and increased coverage of pre- and post-intubation techniques. Fully illustrated and tightly focused, this unique text is the only volume of its kind completely dedicated to airway management. Complete with the latest ASA guidelines, no other volume does what Benumof's Airway Management does. This is the definitive reference on airway management and it belongs on your shelf. Offers a how-to approach to airway management. Includes case examples and analysis. Highly illustrated format provides clarity on complex procedures. A new editor and 50% new contributors bring you the latest research and practice guidelines. Over two hundred new illustrations highlight complex procedures and monitoring techniques with greater clarity. The latest ASA Guidelines make you aware of exactly what procedures are required in difficult cases. Increased complete coverage of pre- and post-intubation techniques takes you from equipment selection through management of complications.

The Dynamics of Language Feb 21 2022 Linguistics - the close study of language and languages - is an indispensable foundation for all forms of knowledge. The African continent is blessed with hundreds of languages which act as local repositories of culture and interaction. South Africa alone has eleven official languages, plus Sign Language, many heritage languages, and new languages of global movements and migration. Part of the linguist's business is to document, record and affirm languages and diversity. Applied linguists use their training to understand and enhance the role of language in education and upliftment, and the opportunities and challenges of new technologies of communication. The International Congress of Linguists meets every five years to reflect the development of the field and 2018 is the first time that the congress is being held in Africa. This book is a collection of the plenary and focus papers presented at the conference and thus represents current thinking in the major branches of language study as represented by leading local and international scholars. The papers discuss the history of languages, their structure, acquisition, diversity and use. At the same time due regard is paid to the African continent in connection with its linguistic diversity, multilingualism and educational and societal concerns. The Congress is meant to affirm the value of the languages of Africa, of languages and Linguistics in general, as well as to inspire and equip younger scholars to undertake advanced research into language in its many facets.

The CAPRISA Clinical Trials: HIV Treatment and Prevention Jan 29 2020 Since its inception 14 years ago, CAPRISA has conducted numerous clinical studies that have influenced international TB-HIV treatment guidelines as well as HIV prevention through innovations in the microbicide and vaccine fields. This book provides a historical account of how each of CAPRISA's high impact studies was created, developed, implemented, analysed and communicated. In doing so, the reader is taken on a journey that provides glimpses into the genesis of research ideas and how this ultimately leads to a range of HIV prevention and treatment studies that have impacted the global response to the HIV and TB epidemics. Comprised of 5 sections, the book details the following: HIV epidemic in South Africa and the establishment of a research centre to undertake clinical, epidemiological and laboratory research on HIV. CAPRISA's clinical trials on HIV and HSV-2 prevention. These studies investigated the impact of tenofovir gel as topical antiretroviral pre-exposure prophylaxis (PrEP), implementation of topical PrEP through family planning clinics, conditional cash incentives for HIV prevention, HIV vaccines, and passive immunisation with broadly neutralising antibodies. CAPRISA's research on the treatment of HIV and TB co-infection. A review of the major scientific findings from the CAPRISA studies on acute infection and genital mucosal immunology. Essential support activities for the conduct of clinical trials, including research laboratories and pharmacies, as well as establishing effective communication and sustainable structures for community engagement to maintain effective and respectful partnerships with participating communities. The book concludes with a chapter about the challenges facing future HIV prevention and treatment trials. The CAPRISA Clinical Trials: HIV Treatment and Prevention is a resource for undergraduate and postgraduate students, health care providers, doctors, decision-makers and researchers who are seeking guidance and insights on clinical trials - their creation, conduct and impact.

Studies on Multilingual Lexicography May 15 2021 Given the new technological advances and their influence and imprint in the design and development of dictionaries and lexicographic resources, it seems important to put together a series of publications that address this new situation, dealing in particular with multilingual and electronic lexicography in an increasingly digital, multilingual and multicultural society. This is the main objective of this volume, which is structured in two central aspects. In the first of them the concept of multilingual lexicography is discussed in regard to the influence that the Internet and the application of digital technologies have exercised and continue to exercise both in the conception and design

of dictionaries and new lexicographic application tools as well as the emergence of new types of users and forms of consultation. The role of the dictionary must necessarily be related to social development and changes. In the second thematic section, different dictionaries and resources that focus on a multilingual and electronic approach to the linguistic data for their lexicographical treatment and consultation are presented.

Dietetics in the 90s Aug 06 2020

Electronic Lexicography Oct 20 2021 This book brings together leading professional and academic lexicographers to report on current developments in the deployment of electronic means in the planning, writing, and dissemination of dictionaries. Every major aspect of electronic lexicography is covered by the book including dictionary types (general and specialized dictionaries, monolingual and multilingual dictionaries, collocation dictionaries, sign dictionaries, collaborative dictionaries) in a range of formats (CD-ROM, web-based, handheld), dictionary-writing systems, integration of corpora. The book also addresses the implications of electronic dictionary-making for lexicographic theory and illustrates how the new developments are integrated into innovative dictionary projects like Wiktionary. The perspective of the user is considered throughout the book, including how electronic dictionaries take account of user needs and whether and how users take advantages of the new features afforded by the electronic medium. This state-of-the-art account of developments in one of the most vibrant areas of reference publishing and language research will appeal to everyone concerned with current lexicography.

E-Lexicography Aug 30 2022 This book looks at current research and future directions in e-lexicography. Online dictionaries and reference tools are increasingly prevalent in a digitized and internet-led era in language study that has embraced computational linguistics. This book responds with theoretical and practical analysis of key topics, from a global range of contributors. Since COBUILD in the 1980s, lexicographers have found it essential to engage with and utilize electronic computational tools. Internet dictionaries, online reference tools and even search engine optimization demand a knowledge of electronic lexicography and force a reassessment of the field. This volume looks at, amongst other topics: • Polyfunctional versus monofunctional dictionary tools • Developing theories of lexicography for electronic mediums • Distinguishing between the database and the dictionary • Online dictionaries not as data repositories but as sophisticated search engines This volume will appeal to scholars in lexicography and to practicing lexicographers.

Shnider and Levinson's Anesthesia for Obstetrics Mar 13 2021 The leading reference on anesthesia during pregnancy and delivery is now in its thoroughly updated Fourth Edition. This volume provides complete information on anesthesia for vaginal delivery, cesarean section, obstetric complications, anesthetic complications, anesthesia for nonobstetric disorders during pregnancy, and management of the fetus and newborn. This edition provides expanded coverage of infectious diseases during delivery, including HIV, herpes, chorioamnionitis, labor epidural fever, and sepsis. The section on anesthetic complications includes a new chapter on the difficult airway, failed intubation, and cardiac arrest. There is a revised chapter on evaluation of the neonate and more information about CT, ultrasound, and MRI.

Abridged Index Medicus Jul 17 2021

Global Virology II - HIV and NeuroAIDS Jul 05 2020 This book on NeuroAIDS, a collection of chapters written by experts and specialists from around the world, provides a global perspective on HIV and NeuroAIDS in the field, clinic, and laboratory. The chapters address the comorbidity of HIV and other infectious agents, including Zika virus, Ebola, Chagas disease, TB and HCV. Also discussed are key topics, such as: • Molecular socioepidemiology • Global HIV and NeuroAIDS • Neuropathology • cART and blood-brain barrier penetration • HIV replicative oscillations • HIV and SIV evolution • Psychiatric comorbidities • Neurosyphilis • The examination of current and innovative models of translational research to translational effectiveness

AIDS Epidemic Update Sep 18 2021 The annual AIDS epidemic update reports on the latest developments in the global AIDS epidemic. With maps and regional summaries, the 2009 edition provides the most recent estimates of the epidemic's scope and human toll and explores new trends in the epidemic's evolution.

HIV Glycans in Infection and Immunity Feb 09 2021 Glycosylation is a common and extremely important modification in biological molecules, particularly of proteins. HIV Glycans in Infection and Immunity provides an overview of the roles of glycans in the transmission/infection, antigenicity, and immunogenicity of HIV and the HIV envelope glycoprotein. It explores recent advances in the understanding of the impact of HIV glycans in infection and their promise for immunological and therapeutic intervention. Novel collaborations between glyco-biologists and immunologists in recent years have led to key advances in the understanding of HIV glycans. These cross-disciplinary endeavors, their achievements and their impact on the field are all addressed, herein.

HIV Transmission Nov 28 2019 This book presents models describing HIV transmission rates at population level, discussing the main statistical methods and analytical interventions. It also assesses the practical applicability of the various modelling techniques, offering readers insights into what methods are available and, more importantly, when they should be used to address HIV transmission at global level. The book includes realistic simulation models fitted to clarify the rate of HIV mother-to-child transmission (HIV MTCT), and substantiates the conclusions that can be drawn as well as the appropriate time for making global-level clinical decisions concerning people living with HIV/AIDS (PLHIVs). Intended for students, academics and researchers, the book offers more than just an introduction to the topic - it also features in-depth, yet easy-to-understand, descriptions of a new mathematical/statistical HIV mother-to-child transmission model, making it a useful resource for clinicians, public health workers and policymakers involved in implementing HIV-prevention programmes at national/global level.

Nematology in South Africa: A View from the 21st Century Apr 01 2020 This unique book contains not only a comprehensive up-to-date summary of the achievements made in all areas of Nematology in South Africa over more than half a century, but it also combines this rather technical part with an insiders narrative of how Nematology started and developed. It also demonstrates how the South African community of nematologists gradually adapted to major changes in agriculture. These were due to a major political shift followed by socio-economic changes and this in an often challenging natural environment. At the same time this book is conceived as a useful source for young scientists to provide them with practical knowledge and critical insight in the field of Nematology. The information given is based primarily on research conducted by nematologists in South Africa. Most of this research was aimed at finding workable solutions for nematological problems confronted by both large-scale commercial producers and smallholding farmers. During a period when funding for scientific research is becoming increasingly scarce, the future demand and quest for practical solutions by applied research will only increase.

Domain Adaptation for Visual Understanding Jun 15 2021 This unique volume reviews the latest advances in domain adaptation in the training of machine learning algorithms for visual understanding, offering valuable insights from an international selection of experts in the field. The text presents a diverse selection of novel techniques, covering applications of object recognition, face recognition, and action and event recognition. Topics and features: reviews the domain adaptation-based machine learning algorithms available for visual understanding, and provides a deep metric learning approach; introduces a novel unsupervised method for image-to-image translation, and a video segment retrieval model that utilizes ensemble learning; proposes a unique way to determine which dataset is most useful in the base training, in order to improve the transferability of deep neural networks; describes a quantitative method for estimating the discrepancy between the source and target data to enhance image classification performance; presents a technique for multi-modal fusion that enhances facial

action recognition, and a framework for intuition learning in domain adaptation; examines an original interpolation-based approach to address the issue of tracking model degradation in correlation filter-based methods. This authoritative work will serve as an invaluable reference for researchers and practitioners interested in machine learning-based visual recognition and understanding.

Theory and Practice of Specialised Online Dictionaries Aug 18 2021 This book is the first comprehensive monograph on the Function Theory of Lexicography, which originated at the Aarhus School of Business (Aarhus University). Function Theory considers dictionaries to be tools that are constructed for assisting specific users with punctual needs in specific usage situations, e.g. communicative-oriented situations and cognitive-oriented situations. The book's main focus is on defending the independent academic status of lexicography and its corollary: The process of designing, compiling and updating (specialised) online dictionaries needs a theoretical framework that addresses general and specific aspects. The former are common to all types of information tools, the latter are mainly dependent on the media for which the information tool is constructed and their specific target users. This book offers both aspects and moves from the highest level of abstraction to very detailed aspects of lexicographic work, e.g. how to convert an originally-conceived polyfunctional online dictionary into several monofunctional usage-based ones. The book illustrates that the theory and the methodology currently used by advocates of the Function Theory of Lexicography offers better results than other approaches and therefore makes its case for proposing the Function Theory for terminological/terminographical work.

Surviving on the Move Sep 06 2020 Since the collapse of apartheid, there have been major increases in migration flows within, to and from the Southern African region. Cross-border movements are at an all-time high across the region and internal migration is at record levels. The implications of greater mobility for areas of origin and destination have not been systematically explored. Migration is most often seen as a negative phenomenon, a result of increased poverty and the failure of development. More recently, the positive relationship between migration and development has been emphasised by agencies such as the Global Commission on International Migration, the Global Forum on Migration and Development, the United Nations Development Programme and the African Union. The chapters in this publication are all based on primary research and examine various facets of the relationship between migration, poverty and development, including issues that are often ignored in the migration-development debate like migration and food security and migration and vulnerability to HIV. The book argues that the development and poverty reduction potential of migration is being hindered by national policies that fail to recognise and build on the positive aspects and potential of migration. As a result, as these studies show, migrants are often pushed to the margins where they are forced to "survive on the move". Their treatment violates labour laws and basic human rights and compromises the potential of migration as a means to create sustainable livelihoods, reduce poverty and food insecurity, mitigate the brain drain and promote the productive use of remittances. This book shows that migrant lives and livelihoods should be at the centre of international and African debates about migration, poverty and development.

HIV Prevention Mar 01 2020 HIV/AIDS continues to be the pandemic of our times and there has not been a comprehensive medically based AIDS prevention book published in the last 5 years. It is estimated that 36 to 45 million people including 2-3 million children already are infected worldwide and an additional 4-7 million more are infected each year. There are about 6,000 new infections daily and about 12 million AIDS orphans. People receiving AIDS treatments feel well and have no detectable viral load, but still can infect others. And even when a vaccine is found, it will take many years before it can be administered across the developing world. * Discusses all aspects of AIDS prevention, from epidemiology, molecular immunology and virology to the principles of broad-based public health prevention interventions. * Special focus on the array of interventions that have been proven effective through rigorous study * Identifies new trends in HIV/AIDS epidemiology and their impact on creating and implementing prevention interventions * Incorporates virology, biology, infectious diseases, vaccinology, microbicides and research methodologies into AIDS prevention

The Routledge Handbook of Lexicography Jan 11 2021 The Routledge Handbook of Lexicography provides a comprehensive overview of the major approaches to lexicography and their applications within the field. This Handbook features key case studies and cutting-edge contributions from an international range of practitioners, teachers, and researchers. Analysing the theory and practice of compiling dictionaries within the digital era, the 47 chapters address the core issues of: The foundations of lexicography, and its interactions with other disciplines including Corpus Linguistics and Information Science; Types of dictionaries, for purposes such as translation and teaching; Innovative specialised dictionaries such as the Oenolex wine dictionary and the Online Dictionary of New Zealand Sign Language; Lexicography and world languages, including Arabic, Hindi, Russian, Chinese, and Indonesian; The future of lexicography, including the use of the Internet, user participation, and dictionary portals. The Routledge Handbook of Lexicography is essential reading for researchers and students working in this area.

MODA 6 - Advances in Model-Oriented Design and Analysis Dec 22 2021 This book includes many of the papers presented at the 6th International workshop on Model Oriented Data Analysis held in June 2001. This series began in March 1987 with a meeting on the Wartburg near Eisenach (at that time in the GDR). The next four meetings were in 1990 (St Kyrik monastery, Bulgaria), 1992 (Petrodvorets, St Petersburg, Russia), 1995 (Spetses, Greece) and 1998 (Marseilles, France). Initially the main purpose of these workshops was to bring together leading scientists from 'Eastern' and 'Western' Europe for the exchange of ideas in theoretical and applied statistics, with special emphasis on experimental design. Now that the separation between East and West is much less rigid, this exchange has, in principle, become much easier. However, it is still important to provide opportunities for this interaction. MODA meetings are celebrated for their friendly atmosphere. Indeed, discussions between young and senior scientists at these meetings have resulted in several fruitful long-term collaborations. This intellectually stimulating atmosphere is achieved by limiting the number of participants to around eighty, by the choice of a location in which communal living is encouraged and, of course, through the careful scientific direction provided by the Programme Committee. It is a tradition of these meetings to provide low cost accommodation, low fees and financial support for the travel of young and Eastern participants. This is only possible through the help of sponsors and outside financial support was again important for the success of the meeting.

Trends in Basic and Therapeutic Options in HIV Infection Jun 03 2020 The past decade has seen several changes in HIV prevention, transmission and therapeutic interventions to end the scourge. This book is a collection of expert essays on various aspects of HIV prevention, bioresource deployment, microbicides, host antiviral proteins, antiviral drug responses and novel treatment strategies for which there is evident need for scientific focus and review of the current trend. A visible objective of the book is to provide a wider readership of scientist, clinicians, social workers/HIV caregivers, immunologist, postgraduate students, trainers and vaccine developers an informative and multidisciplinary approach to HIV treatment and intervention strategy by presenting current trends in the development of therapeutic options and its attendant challenges. Practical and informative, the book provides state-of-the-art information on dynamics of HIV distribution, transmission, therapeutic measures and functional cure.

Disease Control Priorities in Developing Countries Oct 08 2020 Based on careful analysis of burden of disease and the costs of interventions, this second edition of 'Disease Control Priorities in Developing Countries, 2nd edition' highlights achievable priorities; measures progressing toward providing efficient, equitable care; promotes cost-effective interventions to targeted populations; and encourages integrated efforts to optimize health. Nearly 500 experts - scientists, epidemiologists, health economists, academicians, and public health practitioners - from around the world contributed to the data sources and

methodologies, and identified challenges and priorities, resulting in this integrated, comprehensive reference volume on the state of health in developing countries.

Cumulated Index Medicus Jun 27 2022

Global Mapping of Infectious Diseases Dec 30 2019 First published in 1963, *Advances in Parasitology* contains comprehensive and up-to-date reviews in all areas of interest in contemporary parasitology. This volume is an outline of global environmental and global population data including scripts for predicting disease distributions and evaluating the accuracy of these mapped products. Several application chapters discuss current research topics appropriately addressed at the global scale. Topics such as tick-borne disease and the mapping of geographic and phylogenetic space; implications of global ecozonation and transportation networks on pathogen flow; and the impacts of climate change on vector-borne diseases are covered in this latest volume. * Includes DVD of global environmental and global population data, including scripts for predicting disease distributions and evaluating the accuracy of these mapped products * Valuable source of both technical and epidemiological data in this rapidly growing field * Discusses practical applications of techniques to the study of parasitic and infectious diseases

The Adolescent Nov 01 2022 *The Adolescent: An Educational Perspective* covers several aspects of adolescent's development. The book discusses an adolescent's physical, cognitive, affective, social, conative, and normative development, together with an overview of pedagogic implications. The text also considers other critical aspects (street children, drugs, sexually transmitted disease, abortion, unemployment, and juvenile delinquency) from a sociopedagogical perspective. Subject specialists in the sciences of criminology, social work, sociology and psychology will find this book invaluable.

HIV Infection in Children and Adolescents Aug 25 2019 This book serves as a reference work on pediatric HIV infection and covers the full bandwidth of topics from an introduction to pathogenesis and epidemiology, over the transmission of the HI virus, to clinical manifestations, treatment, and prevention strategies. Diseases and disorders occurring in HIV infected persons are discussed in detail. The book covers special populations, such as neonates born to an HIV positive mother and adolescents and examines the specific ways of managing HIV disease in these patient groups. This is the first book to cover palliative care as well as ethical, legal and social issues of HIV infection.

HIV in South Africa Nov 20 2021 Winner of the *Sociology of Health and Illness Book Prize 2008* Of approximately 37 million HIV positive people in the world, 24.7 million live in sub-Saharan Africa and about 5.5 million in South Africa. Despite its relatively powerful economy and infrastructure, South Africa has been dramatically affected by the HIV pandemic. Using narrative analysis of a three year interview study and textual analysis of political materials, *HIV in South Africa* examines the impact of HIV on people's everyday lives in the country. Examining the relationship between personal accounts of living with HIV and wider medical, political and religious discourses, the book also highlights the significance of class, race and gender on individuals' experiences. These engaging stories of everyday lives provide an accessible way to connect with HIV as a health and development issue. Fascinating, challenging and constructive, this is an important contribution in an area of great social relevance. The ebook is available free of charge to those with addresses on the United Nations Development Programme's Human Development Index of Medium and Low Rankings (see http://hdr.undp.org/hdr2006/pdfs/report/HDR_2006_Tables.pdf), who can apply to the following address: www.ebookstore.tandf.co.uk

The AIDS Pandemic May 03 2020 *The AIDS Pandemic* explores the ways in which HIV/AIDS has, and continues to transform the wide range of related disciplines it touches. Novel perspectives are provided by a unique panel of internationally recognised experts who cover the unprecedented impact of AIDS on culture, demographics and politics around the world, including how it affected the world's economy, health sciences, epidemiology and public health. This important far-reaching analysis uses the lessons learned from a wide array of disciplines to help us understand the current status and evolution of the pandemic, as it continues to evolve. * Unique and timely presentation of new theories and perspectives * Concentrates on the changes that have taken place in a broad array of related disciplines * Provides key contextual information, for those new to the field or at interface areas between disciplines * Includes an international focus on evolving African and Asian experiences * Focuses on the current strategies for developing vaccines and microbicides * Outlines harm reduction and prevention programs * Explores issues related to delivery of life-saving AIDS medications in resource-constrained environments

Clinical Fluid Therapy in the Perioperative Setting Jul 25 2019 The world's most renowned researchers in fluid management explain what you should know when providing infusion fluids to surgical patients.

The Neurosurgeon's Handbook Sep 26 2019 A compact, readable and highly-authoritative source of critical neurosurgical information, *Neurosurgery* has been produced with the participation of some of the world's leading neurosurgeons and neuroclinicians and is based on the curriculum of British, European and North American neurosurgical training programs. The book is extensively illustrated with hundreds of figures demonstrating the imaging features of all major neurosurgical pathologies, including diagrams explaining key anatomical and surgical concepts, and images showing the features of common brain tumours. There are key references at the end of each chapter and critical commentary of neurosurgical literature is also included. The handbook concisely covers all aspects of adult and paediatric neurosurgery. It is systematically and clearly broken down into easy-to-follow sections such as introductory basic concepts, definitions, epidemiology, pathology, clinical and neuroradiological characteristics, clinical management and decision making. Additional sections on operative treatment include the key critical surgical anatomy, and clear, step-by-step descriptions of common surgical techniques. Widely accepted practice guidelines, major classification schemes and common scales are clearly presented and explained.

HIV and Tuberculosis Nov 08 2020 Globally, HIV-associated tuberculosis is one of the most important causes of infection-related death, accounting for one in every three HIV deaths and over 300,000 in 2017 alone. The HIV epidemic has undermined tuberculosis-control efforts in many countries around the world, as the virus has important modifying effects on the pathogenesis, diagnosis, and treatment of TB. The management of HIV-associated TB is also complicated by rapid clinical progression, immune reconstitution inflammatory syndrome, drug-drug interactions, and shared toxicities. The past two decades have yielded thousands of research publications and review articles on HIV-associated TB. *HIV and Tuberculosis: A Formidable Alliance* consolidates this massive amount of data into a single resource. With contributions from myriad disciplines, including epidemiology, immunology, public health, and clinical medicine, this book provides well-rounded and thorough coverage that will appeal to researchers and clinicians alike.

South African Christian Handbook, 2005-2006 May 27 2022

HIV/AIDS in South Africa Jan 23 2022 This second edition of the book provides up-to-date information on new drugs, new proven HIV prevention interventions, a new chapter on positive prevention, and current HIV epidemiology. This definitive text covers all aspects of HIV/AIDS in South Africa, from basic science to medicine, sociology, economics and politics. It has been written by a highly respected team of South African HIV/AIDS experts and provides a thoroughly researched account of the epidemic in the region.

HIV/AIDS in South Africa Apr 25 2022 A thoroughly researched account of the AIDS epidemic in the southern African region.

Overcoming Intolerance in South Africa Jul 29 2022 Table of contents

World Clinics: Anesthesia, Critical Care & Pain - Analgesia & Anesthesia in Labor and Delivery - 1 Dec 10 2020 Part of the *World Clinics: Anesthesia, Critical Care & Pain* series, this book presents evidence-based reviews of current protocols in the management of labour and delivery using analgesia and/or anaesthesia.

The Global HIV Epidemics among People Who Inject Drugs Oct 27 2019 A global economic analysis of HIV infection amongst

people who inject drugs, finding that harm reduction interventions are not implemented to the level that their efficacy warrants, and that doing so at scale would be both cost effective and responsive to a human rights imperative.

Digital Economies: SMEs and E-Readiness Apr 13 2021 "This book provides valuable insights into the current state of the digital economy and the ability of SMEs to leverage Information and Communication Technologies (ICTs) so that they may overcome their traditional laggard position in the global business market"--Provided by publisher.
