The Life Story Interview Nov 23 2019 This volume provides specific suggestions for preparing for and carrying out a life story interview. It places the life story interview into a wider research context before moving on to planning and then conducting the interview. Finally, the book deals with the issues of transcribing and interpreting the interview.

Interviewing for Qualitative Inquiry Feb 07 2021 Engagingly written, this book builds the reader's skills for conducting in-depth interviews designed to address a particular research question. With an emphasis on the dynamics of the research relationship, Ruthellen Josselson artfully demonstrates the steps of a successful interview. Each step is illustrated with excerpts from interviews on diverse topics. The book describes how to structure interviews effectively, develop questions that elicit meaningful narratives, cultivate skills for empathic listening and responding, avoid common pitfalls, and deal with problems that develop in an interview. Pedagogical Features \*Practice exercises adapted from Josselson's popular workshops. \*Annotated examples of "good" and "bad" interviews. \*A chapter on interviewing dos and don'ts. \*Appendices with interview aids, sample follow-up questions, and a sample consent form.

Understanding and Using Health Experiences Oct 27 2022 Improving patient experience is a global priority for health policy-makers and care providers. This

book critically examines the various ways in which people's experience of health and healthcare can be recorded, analysed and therefore improved.

*Interviewing in Social Science Research* Feb 25 2020 What is interviewing and when is this method useful? What does it mean to select rather than sample interviewees? Once the researcher has found people to interview, how does she build a working relationship with her interviewees? What should the dynamics of talking and listening in interviews be? How do researchers begin to analyze the narrative data generated through interviews? Lee Ann Fujii explores the answers to these inquiries in *Interviewing in Social Science Research*, the latest entry in the Routledge Series on Interpretive Methods. This short, highly readable book explores an interpretive approach to interviewing for purposes of social science research. Using an interpretive methodology, the book examines interviewing as a relational enterprise. As a relational undertaking, interviewing is more akin to a two-way dialogue than a one-way interrogation. Fujii examines the methodological foundations for a relational approach to interviewing, while at the same time covering many of the practical nuts and bolts of relational interviewing. Examples come from the author's experiences conducting interviews in Bosnia, Rwanda, and the United States, and from relevant literatures across a variety of social scientific disciplines. Appendices to the book contain specific tips and suggestions for relational interviewing in addition to interview excerpts that give readers a sense of how relational interviews unfold. This book will be of great value to graduate students and researchers from across the social sciences who are considering or planning to use interviews in their research, and can be easily used by academics for teaching courses or workshops in social science methods.

*Emotion and Discourse in L2 Narrative Research* Aug 13 2021 This book examines the interactional management of emotionality in second language autobiographical interview research. Advancing a discursive constructionist approach, it offers a timely methodological and reflexive perspective that brings into focus the dynamic and dilemmatic aspects of interviewee and interviewer identities and experiences, and it makes visible the often unexpected and unseen consequences for the research project and beyond. The author weaves together critical discussion and empirical analysis based on longitudinal, narrative-based research with adult immigrants from Southeast Asia living in the US and Canada. This interdisciplinary book will be compelling reading for students, researchers, and others interested in emotion, narrative, discourse, identity, interaction, interviews, and qualitative research.

*Qualitative Interviewing* Aug 01 2020 The 2nd edition of this work has been completely rewritten to add new examples & to better integrate the presentation of topics. Readers will see how the choice of topic influences question wording & how the questions asked influence the analysis.

*Qualitative Research Interviewing* Aug 25 2022 'Wengraf provides a comprehensive theoretical and practical guide to the planning, conduct, and interpretative analysis of data by semi-structured interviewing methods. Forthright and frank in his comments about the limitations and practical implications of varying choices which investigators have to make in designing their research projects. Reading this text is like having a tough but expert and caring mentor who wants you to do the best research possible, but will not hesitate to tell you when your ideology and assumptions skew that possibility' - Vincent W Hevern, Le Moyne College, USA Unique in its conceptual coherence and the level of practical detail, this book provides a comprehensive resource for those concerned with the practice of semi-structured interviewing, the most commonly used interview approach in social research, and in particular for in-depth, biographic narrative interviewing. It covers the full range of practices from the identification of topics through to strategies for writing up research findings in diverse ways.

*How History Gets Things Wrong* Sep 21 2019 Why we learn the wrong things from narrative history, and how our love for stories is hard-wired. To understand

something, you need to know its history. Right? Wrong, says Alex Rosenberg in *How History Gets Things Wrong*. Feeling especially well-informed after reading a book of popular history on the best-seller list? Don't. Narrative history is always, always wrong. It's not just incomplete or inaccurate but deeply wrong, as wrong as Ptolemaic astronomy. We no longer believe that the earth is the center of the universe. Why do we still believe in historical narrative? Our attachment to history as a vehicle for understanding has a long Darwinian pedigree and a genetic basis. Our love of stories is hard-wired. Neuroscience reveals that human evolution shaped a tool useful for survival into a defective theory of human nature. Stories historians tell, Rosenberg continues, are not only wrong but harmful. Israel and Palestine, for example, have dueling narratives of dispossession that prevent one side from compromising with the other. Henry Kissinger applied lessons drawn from the Congress of Vienna to American foreign policy with disastrous results. Human evolution improved primate mind reading—the ability to anticipate the behavior of others, whether predators, prey, or cooperators—to get us to the top of the African food chain. Now, however, this hard-wired capacity makes us think we can understand history—what the Kaiser was thinking in 1914, why Hitler declared war on the United States—by uncovering the narratives of what happened and why. In fact, Rosenberg argues, we will only understand history if we don't make it into a story.

*Narrative Research in Health and Illness* Sep 14 2021 This comprehensive book celebrates the coming of age of narrative in health care. It uses narrative to go beyond the patient's story and address social, cultural, ethical, psychological, organizational and linguistic issues. This book has been written to help health professionals and social scientists to use narrative more effectively in their everyday work and writing. The book is split into three, comprehensive sections; Narratives, Counter-narratives and Meta-narratives.

*The Active Interview* Jun 23 2022 The interpretive turn in social science has taken the interview and turned it upside down. Once thought to be the pipeline through which information was transmitted from a passive subject to an omniscient researcher, the new "active interview" considers the interviewer and interviewee as equal partners in constructing meaning around an interview event. This changes everything - from the way of conceiving a sample to the ways in which the interview may be conducted and the results analyzed. In this brief volume, James A. Holstein and Jaber F. Gubrium outline the differences between the active interview and the traditional interview and give novice researchers clear guidance on conducting an interview that is the rich product of both parties. Students and professionals who use qualitative methods in the fields of sociology, anthropology, communication, psychology, education, social work, gerontology, and management will find *The Active Interview* to be a helpful and cogent guidebook.

*Handbook of Interview Research* Nov 16 2021 Aimed at professionals in market research and journalism as well as researchers, academics and students, this handbook is both an encyclopedia providing discussions of methodological issues and a story of a particular tale of interviewing.

*The SAGE Handbook of Interview Research* Jan 26 2020 The new edition of this landmark volume emphasizes the dynamic, interactional, and reflexive dimensions of the research interview. Contributors highlight the myriad dimensions of complexity that are emerging as researchers increasingly frame the interview as a communicative opportunity as much as a data-gathering format. The book begins with the history and conceptual transformations of the interview, which is followed by chapters that discuss the main components of interview practice. Taken together, the contributions to *The SAGE Handbook of Interview Research: The Complexity of the Craft* encourage readers simultaneously to learn the frameworks and technologies of interviewing and to reflect on the epistemological foundations of the interview craft.

*Narrative Research* Oct 15 2021 A concise volume aimed at researchers and academics

in sociology, anthropology, psychology and interpersonal communication.

*Narrative Methods for the Human Sciences* Jun 30 2020 "Cathy Riessman is the leading figure in narrative research and her new book is a delight. Covering basic issues of transcription and research credibility as well as visual data and engagingly written, it is a goldmine for students and researchers alike. If we want to make narrative research serious and revealing, it is to this book that we should turn." –David Silverman, Professor Emeritus, Goldsmiths' College, University of London "Narrative Methods for the Human Sciences provides an accessible framework for researchers – to analyse narrative texts with confidence, empathy, and humility. –NARRATIVE INQUIRY "This is a terrific book. Cathy Riessman has an encyclopedic knowledge of this field and of the participants in it. This breadth and depth of knowledge is abundantly clear throughout the book." –Susan Bell, Bowdoin College "This book has been a great source of inspiration to me and my students, not only for its methodological clarity, but also for the spirit of social activism it engenders." –Ian Baptiste, The Pennsylvania State University "Narrative Methods for the Human Sciences is an essential starting point for both students and experienced researchers interested in using narrative analysis in applied or other contexts. Written with admirable clarity, an engaging style, and supported by detailed examples of analysis, the book outlines the main methodological issues and approaches within the exciting and fast-developing field of narrative research. Even researchers already familiar with narrative methods should find the presentation of thematic, structural, dialogic/performance, and visual forms of analysis a fruitful stimulus to new research endeavours." –Brian Roberts, University of Central Lancashire, U.K. "I just had to thank you for paving the path for us new and 'hopeful' narrative researchers. I have been a student of both your books on narrative analysis, and want to thank you for your guidance from your work, and also your latest book *Narrative Methods for the Human Sciences*. This work and the references you have chosen for us have helped me immensely during this time in my doctoral program, especially as I enter into the analysis phase." –Maria T. Yelle, nursing doctoral candidate, University of Wisconsin-Madison *Narrative Methods for the Human Sciences* provides a lively overview of research based on constructing and interpreting narrative. Designed to improve research practice, it gives a detailed discussion of four analytic methods that students can adapt. Author Catherine Kohler Riessman explains how to conduct the four kinds of narrative analysis using model studies from sociology, anthropology, psychology, education and nursing. Throughout the book, she compares different approaches including thematic analysis, structural analysis, dialogic/performance analysis, and visual narrative analysis. The book helps students confront specific issues in their research practice, including how to construct a transcript in an interview study; complexities of working with materials translated from another language; defining narrative segments; relating text and context; locating oneself as the researcher in a responsible way in an inquiry; and arguing for the credibility of the case-based approach. Broad in scope, *Narrative Methods for the Human Sciences* also offers concrete guidance in individual chapters for students and established scholars wanting to join the "narrative turn" in social research. Key Features Focuses on four particular methods of narrative analysis: This text provides specific diverse exemplars of good narrative research, as practiced in several social science and

*Doing Interviews* Dec 25 2019 This is a concise introduction to the richness and scope of interviewing in social science research, teaching the craft of interview research with practical, hands-on guidance. Incorporating discussion of the wide variety of methods in interview-based research and the different approaches to reading the data, this book will help you to navigate the broad field of qualitative research with confidence and get out there and start collecting your data.

Doing Qualitative Research Differently May 22 2022 This is both a 'how to' book and one that critically reviews many of the assumptions, claims and methods of qualitative research. Applying a psycho-social understanding of subjectivity to research practice involves conceptualising researcher and researched as co-producers of meanings in the research relationship. The authors use the notion of the "defended subject" to indicate that people will defend themselves against any anxieties in the information they provide in a research context. To interpret interviewees' responses should entail developing a method in which narratives are central, as should a strategy of interpretation in which interviewees' free associations are given precedence over narrative coherence. The author

Life History and Narrative Jul 20 2019 Narrative inquiry refers to a subset of qualitative research design in which stories are used to describe human action. This book contains current ideas in this field of research, and will be of interest to qualitative researchers.

Narrative Analysis Dec 17 2021 "People tell stories to help organize and make sense of their lives. In the past, their narratives have often been torn apart by social scientists looking for themes, variables, and specific answers to specific questions. But in recent years, the development of narrative analysis has given life to the study of the narrative as a form of information for social research. Why are they constructed as they are? How does one dissect a narrative to understand the lived experience of the narrator? What steps can the researcher take to translate these tales and life stories into usable research? This book provides a detailed primer on the use of narrative analysis, its theoretical underpinnings and worldview, and the methods it uses."--[Source inconneue]

Using Narrative in Social Research Jun 11 2021 'Jane Elliott's examination of the use of "narrative" within the broad context of social science inquiry is a must-read for both qualitative and quantitative researchers, novice and expert alike' - *Journal of Advanced Nursing* 'This important book does an impressive job of synthesising a complex literature and bringing together both qualitative and quantitative methods of narrative analysis. It will become a milestone in the development of narrative methods. Although ground-breaking in many ways, it is very clearly written and accessible to readers from a wide variety of backgrounds and methodological experience' - Nigel Gilbert, University of Surrey 'An elegantly written, scholarly and accessible text. Jane Elliott shows a sophisticated appreciation of contemporary methodological developments, and makes a persuasive case for the use of narrative approaches in both qualitative and quantitative research. The book challenges and advances debates about combining methods, and shows how stories can work within and across conventional research boundaries. It is a truly original contribution to the literature' - Amanda Coffey, Cardiff School of Social Sciences 'An outstanding book. Jane Elliott breaks new ground by demonstrating to new generations of social scientists how the power of narrative can fruitfully be harnessed in social research. This is a "must read" book' - Professor Mike Savage, University of Manchester This is a lucid and accessible introduction to narrative methods in social research. It is also an important book about the nature, role and theoretical basis of research methodology in general. Jane Elliott instructs the reader on the basic methods and methodological assumptions that form the basis of narrative methods. She does so in a way that is practical and accessible and in a way that will make the book a favourite with students and experienced researchers alike. Elliott argues that both qualitative and quantitative methods are characterised by a concern with narrative, and that our research data can best be analyzed if it is seen in narrative terms. In concrete, step-by-step terms she details for the reader how to go about collecting data and how to subject that data to narrative analysis, while at the same time placing this process in its wider theoretical context. She works across the traditional quantitative/qualitative divide to set out the ways in which narrative

researchers can uncover such issues as social change, causality and social identity. She also shows how the techniques and skills used by qualitative researchers can be deployed when doing quantitative research and, similarly, how qualitative researchers can sometimes profit from using quantitative skills and techniques. "This book provides both a fascinating and a challenging read. What sets this text apart from other books on research methodology and methods is that it does not focus exclusively on either quantitative or qualitative research approaches, but rather attempts to bridge the divide. The book should be compulsory reading not only for those aspiring to undertake narrative research and those students undertaking higher degree research courses, but also for those more experienced researchers wishing to explore contemporary issues in research methods and methodology. As a recent recruit to a lecturer-practitioner post with little recent experience in the subject area covered by this book, I found it met my needs very well. I would certainly recommend this book for purchase." Dr Andrew Pettipher, University of Nottingham, UK.

*Evidence-based Child Forensic Interviewing* Apr 21 2022 Interviewers face a dilemma when questioning children in a forensic context--an inherent mismatch between the needs of the legal system and the capabilities of young children. This is especially problematic when legal decisions with potentially serious consequences depend on the results of the interview, such as in cases involving eyewitness memory, divorce, and allegations of abuse and neglect. Without accommodations to a child's developmental level, interviews can result in false reports, miscommunication, and misinterpretation, despite an interviewer's best intentions. *Evidence-based Child Forensic Interviewing* addresses this discrepancy and presents an innovative approach to close the gap by providing the scaffolding, structure, and guidance children need to perform optimally. Created by Drs. Karen J. Saywitz and Lorinda B. Camparo and outlined in this guide, the Developmental Narrative Elaboration (DNE) Interview is an evidence-based step-by-step process and set of techniques for forensic contexts designed to help children ages 3-12 accurately tell as much as they can about their experiences and perceptions. The DNE is comprised of a developmentally sensitive core template and optional techniques that can be embedded at the interviewer's discretion as cases unfold. This book reviews the relevant research and then, with sample language, transcripts, and suggested activities, details a three-phased interview with examples. This empirically supported guide is designed to meet the needs of both novice and seasoned professionals in mental health, social service, law enforcement, and the legal system when children's input is needed for legal and social-service decision making.

*Understanding Narrative Inquiry* Sep 02 2020 *Understanding Narrative Inquiry: The Crafting and Analysis of Stories as Research* is a comprehensive, thought-provoking introduction to narrative inquiry in the social and human sciences that guides readers through the entire narrative inquiry process--from locating narrative inquiry in the interdisciplinary context, through the philosophical and theoretical underpinnings, to narrative research design, data collection (excavating stories), data analysis and interpretation, and theorizing narrative meaning. Six extracts from exemplary studies, together with questions for discussion, are provided to show how to put theory into practice. Rich in stories from author Jeong-Hee Kim's own research endeavors and incorporating chapter-opening vignettes that illustrate a graduate student's research dilemma, the book not only accompanies readers through the complex process of narrative inquiry with ample examples, but also helps raise their consciousness about what it means to be a qualitative researcher and a narrative inquirer in particular.

[Interview Hero](#) Jul 12 2021 Are you tired of losing job offers at the interview stage? Sick of memorizing worn-out answer templates that make you feel like a fraud at best or a total douche at worst? Ready to start loving interviews instead of

hating and fearing them? In this conversational and life-changing book, Angela Guido teaches you how to inspire people with your true story, ups and downs and all. While the other applicants will bore the interviewer to tears with their canned responses and pretense of perfection, you will entertain, engage, and connect. That will make you the most likeable candidate, the one your interviewer champions behind closed doors. Interview Hero teaches you: New mindsets that transform interviews from painful interrogations to enjoyable conversations; Deep storytelling skills so you can relate your life's accomplishments as inspiring narratives without a trace of arrogance; A step-by-step process to examine your experiences and construct your personal best answers to all the major interview question types; Techniques to build and maintain confidence before and during the interview so you can win the offer. Remember, heroes aren't born heroes. They become heroes. Read on to become an Interview Hero today.

What is Narrative Research? Mar 28 2020 This book is available as open access through the Bloomsbury Open Access programme and is available on [www.bloomsburycollections.com](http://www.bloomsburycollections.com). Narrative research has become a catchword in the social sciences today, promising new fields of inquiry and creative solutions to persistent problems. This book brings together ideas about narrative from a variety of contexts across the social sciences and synthesizes understandings of the field. Rather than focusing on theory, it examines how narrative research is conducted and applied. It operates as a practical introductory guide, basic enough for first-time researchers, but also as a window onto the more complex questions and difficulties that all researchers in this area face. The authors guide readers through current debates about how to obtain and analyse narrative data, about the nature of narrative, the place of the researcher, the limits of researcher interpretations, and the significance of narrative work in applied and in broader political contexts.

Psychological Therapy for Paediatric Acquired Brain Injury Aug 21 2019 Children, young people and families living with an acquired brain injury (ABI), whether through accident, illness, injury or abuse, are rarely offered psychological therapy, and yet the benefits of such interventions can be profound. This important new book, providing a selection of practice examples and insights from frontline practitioners, will be essential reading for any paediatric therapist or clinician. Beginning with a "life story" of the brain where emphasis is placed on how brain development is fundamentally related to its environment, the book offers key background knowledge before showcasing the core topics of assessment, psychological formulation and intervention. It features a range of therapeutic models, includes direct and indirect work, group work and family therapy, with settings varying from inpatient neurorehabilitation to community work and the transition to education. The long-term needs of those in the criminal justice system are also addressed. The closing chapters focus on the debate around effective outcome measurement and outline a vision for better services. Elevating the voices of our children, young people and families living with ABI, this pioneering book will provide practitioners with the confidence to work collaboratively across a range of children and young people with disorders of consciousness or communication to those with behaviour that challenges others to manage. It offers new ways to understand both children's pasts and their futures, and will be essential reading for anyone in the field.

The Handbook of Narrative and Psychotherapy Dec 05 2020 The narrative turn in psychotherapy entails practitioners seeing their work as appreciating client stories and helping clients re-author their life stories. Twenty-one chapters, presented by Angus (York U., UK) and McLeod (U. of Abertay Dundee, UK) bring together different strands of thinking ab

What is Qualitative Interviewing? Nov 04 2020 This book is available as open access through the Bloomsbury Open Access programme and is available on

[www.bloomsburycollections.com](http://www.bloomsburycollections.com). *What is Qualitative Interviewing?* is an accessible and comprehensive 'what is' and 'how to' methods book. It is distinctive in emphasising the importance of good practice in understanding and undertaking qualitative interviews within the framework of a clear philosophical position. Rosalind Edwards and Janet Holland provide clear and succinct explanations of a range of philosophies and theories of how to know about the social world, and a thorough discussion of how to go about researching it using interviews. A series of short chapters explain and illustrate a range of interview types and practices. Drawing on their own and colleagues' experiences Holland and Edwards provide real research examples as informative illustrations of qualitative interviewing in practice, and the use of a range of creative interview tools. They discuss the use of new technologies as well as tackling enduring issues around asking and listening and power dynamics in research. Written in a clear and accessible style the book concludes with a useful annotated bibliography of key texts and journals in the field. *What is Qualitative Interviewing?* provides a vital resource for both new and experienced social science researchers across a range of disciplines.

*The Problem-Centred Interview* Apr 09 2021 This book provides the first English language account of the interview method known as the PCI. Offering a way of collecting knowledge by means of involving people actively in the research process, the interviewer takes the role of a well-informed traveller. With careful preparation and planning, the interviewer sets out with priorities and expectations, but the story the interviewer tells about his journey depends on the people encountered along the road. Novice and experienced interview researchers across the social, educational and health sciences will find this an invaluable guide to conducting interviews. Andreas Witzel is senior researcher (retired) at the University of Bremen and former director of the Bremen Archive for Life Course Research. Herwig Reiter is senior researcher in the Department of Social Monitoring and Methodology of the German Youth Institute in Munich.

*Doing Interview Research* Apr 28 2020 If you want to use interview methods in your research project but are not sure where to start, this book will get you up and running. With hands-on advice for every stage of the social research process, it helps you succeed in every step, from understanding interview research through to designing and conducting your study and working with data. The book: Discusses eight methods of interviewing in-depth, including semi-structured interviews, narrative interviews, focus groups and online interviews. Features over 75 case studies of real interview research from across the globe, including Australia, Canada, Germany, Norway, the Philippines and South Africa. Spotlights strategies for conducting ethical, inclusive research, including indigenous research approaches. Packed not only with learning features - including learning objectives, checklists of questions to ask yourself at every stage of your project, practical exercises to help you put your learning into practice and further reading so you can broaden your knowledge - it is also supported by online resources such as annotated transcripts and videos of mock interviews to empower any social science student to use interview research methods with confidence.

*Qualitative Researching with Text, Image and Sound* Feb 19 2022 'This excellent text will introduce advanced students - and remind senior researchers - of the availability of a broad range of techniques available for the systematic analysis of social data that is not numeric. It makes the key point that neither quantitative nor qualitative methods are interpretive and at the same time demonstrates once and for all that neither a constructivist perspective nor a qualitative approach needs to imply abandonment of rigor. That the chapters are written by different authors makes possible a depth of expertise within each that is unusually strong' - Susanna Hornig Priest, Texas A&M University; Author of 'Doing Media Research' *Qualitative Researching with Text, Image and Sound* offers a unique resource for today's social researcher. This practical handbook provides a

comprehensive and accessible introduction to a broad range of research methods with the objective of clarifying procedures, good practice and public accountability. Following an introduction which discusses quality and quantity, and how these relate to issues of representation and knowledge interests in social research, the book is organized into four parts: · Part I covers different ways of collecting data and different types of data relating to text, image and sound: corpus construction, individual and group interviewing, narrative and episodic interviewing, video and film, and bemetology. · Part II introduces the main analytic approaches for text, image and sound: classical content analysis, argumentation, discourse, conversation analysis, rhetoric, semiotics, analysis of moving images, and of noise and music - each includes an introduction with examples and step-by-step advice on how to do it. · Part III covers computer-assisted analysis - including computer-assisted qualitative data analysis and key-word-in-context analysis. · Part IV addresses issues of good practice, looking at problems and fallacies in interpretation and develops quality criteria for qualitative research. This book provides researchers with the skills and knowledge to make the appropriate choices between different methods, types of data, and analytic procedures, and gives examples and criteria of good practice for each one. It will be essential reading for students and researchers across the social sciences.

Narrative Inquiry Mar 20 2022 "This Pocket Guide to narrative inquiry will present the method's major theoretical underpinnings; rationales for use of narrative research methods within life history and case study frameworks; primary strategies for eliciting, listening to, and transcribing first-person oral narratives; prevailing analytic frameworks for analysis of such data; ethical considerations and Institutional Review Board-related challenges in narrative inquiry; and issues pertaining to trustworthiness and theoretical and empirical generalization. The author, an esteemed researcher, will illustrate concepts from her on-going narrative investigation of abusive and neglectful mothers who lost and regained custody of their children within one impoverished community, a useful site from which to discuss issues of memory, trauma, context and process, and narrative truth. References to exemplary published narrative studies of questions of concern to social work practitioners in the areas of psychotherapy, child welfare practice, and organizational/community practice, for example, will also be included. The volume is designed, in short, to address the issues an investigator would need to consider in order to develop a narrative inquiry: questions of theory, method, and meaning. Yet, it is not proscriptive. It will focus on the topical areas an investigator should address when planning a narrative study, and it provides a summary of two or three ways in which scholars have answered each one. This approach recognizes the connections among epistemology, features of social work problems, and method that defy simple categorization and acknowledges the emergent and interdisciplinary nature of narrative inquiry."--Provided by publisher.

The Life Story Interview Sep 26 2022 First-person narratives are a fundamental tool of the qualitative researcher. This volume provides specific suggestions and guidelines for preparing and executing a life story interview. Robert Atkinson places the life story interview into a wider research context before elaborating on planning and then conducting the interview. Finally, the book deals with the issues of transcribing and interpreting the interview. The author provides a sample life story interview in the appendix.

Seeing Ghosts May 30 2020 AN NPR BOOKS WE LOVE 2021 PICK \* A TIME MUST-READ BOOK OF 2021 PICK \* A NEW YORK TIMES NOTABLE BOOK OF 2021 \* A HARPER'S BAZAAR BOOK YOU NEED TO READ IN 2021 \* A TOWN & COUNTRY BEST BOOK OF 2021 PICK \* A FORTUNE BEST BOOK OF 2021 PICK For readers of Helen Macdonald and Elizabeth Alexander, an intimate and haunting portrait of grief and the search for meaning from a singular new talent as told through the prism of three generations of her Chinese American family. Kat Chow has always been unusually fixated on death. She worried constantly

about her parents dying---especially her mother. A vivacious and mischievous woman, Kat's mother made a morbid joke that would haunt her for years to come: when she died, she'd like to be stuffed and displayed in Kat's future apartment in order to always watch over her. After her mother dies unexpectedly from cancer, Kat, her sisters, and their father are plunged into a debilitating, lonely grief. With a distinct voice that is wry and heartfelt, Kat weaves together a story of the fallout of grief that follows her extended family as they emigrate from China and Hong Kong to Cuba and America. *Seeing Ghosts* asks what it means to reclaim and tell your family's story: Is writing an exorcism or is it its own form of preservation? The result is an extraordinary new contribution to the literature of the American family, and a provocative and transformative meditation on who we become facing loss.

*The Interview* Jan 18 2022 What are new interview methods and practices in our new 'interview society' and how do they relate to traditional social science research? This volume interrogates the interview as understood, used - and under-used - by anthropologists. It puts the interview itself in the hotseat by exploring the nature of the interview, interview techniques, and illustrative cases of interview use. What is a successful and representative interview? How are interviews best transcribed and integrated into our writing? Is interview knowledge production safe, ethical and representative? And how are interviews used by anthropologists in their ethnographic practice? This important volume leads the reader from an initial scrutiny of the interview to interview techniques and illustrative case studies. It is experimental, innovative, and covers in detail matters such as awkwardness, silence and censorship in interviews that do not feature in general interview textbooks. It will appeal to social scientists engaged in qualitative research methods in general, and anthropology and sociology students using interviews in their research and writing in particular.

*Research Interviewing* May 10 2021 Interviews hold a prominent place among the various research methods in the social and behavioral sciences. This book presents a powerful critique of current views and techniques, and proposes a new approach to interviewing. At the heart of Mishler's argument is the notion that an interview is a type of discourse, a speech event: it is a joint product, shaped and organized by asking and answering questions. This view may seem self-evident, yet it does not guide most interview research. In the mainstream tradition, the discourse is suppressed. Questions and answers are regarded as analogues to stimuli and responses rather than as forms of speech; questions and the interviewer's behavior are standardized so that all respondents will receive the same stimulus; respondents' social and personal contexts of meaning are ignored. While many researchers now recognize that context must be taken into account, the question of how to do so effectively has not been resolved. This important book illustrates how to implement practical alternatives to standard interviewing methods. Drawing on current work in sociolinguistics as well as on his own extensive experience conducting interviews, Mishler shows how interviews can be analyzed and interpreted as narrative accounts. He places interviewing in a sociocultural context and examines the effects on respondents of different types of interviewing practice. The respondents themselves, he believes, should be granted a more extensive role as participants and collaborators in the research process. The book is an elegant work of synthesis---clearly and persuasively written, and supported by concrete examples of both standard interviewing and alternative methods. It will be of interest to both scholars and clinicians in all the various fields for which the interview is an essential tool.

*Doing Qualitative Research Differently* Mar 08 2021 This is both a 'how to' book and one that critically reviews many of the assumptions, claims and methods of qualitative research. Applying a psycho-social understanding of subjectivity to research practice involves conceptualising researcher and researched as co-

producers of meanings in the research relationship. The authors use the notion of the "defended subject" to indicate that people will defend themselves against any anxieties in the information they provide in a research context. To interpret interviewees' responses should entail developing a method in which narratives are central, as should a strategy of interpretation in which interviewees' free associations are given precedence over narrative coherence. *The SAGE Encyclopedia of Communication Research Methods* Jul 24 2022 Communication research is evolving and changing in a world of online journals, open-access, and new ways of obtaining data and conducting experiments via the Internet. Although there are generic encyclopedias describing basic social science research methodologies in general, until now there has been no comprehensive A-to-Z reference work exploring methods specific to communication and media studies. Our entries, authored by key figures in the field, focus on special considerations when applied specifically to communication research, accompanied by engaging examples from the literature of communication, journalism, and media studies. Entries cover every step of the research process, from the creative development of research topics and questions to literature reviews, selection of best methods (whether quantitative, qualitative, or mixed) for analyzing research results and publishing research findings, whether in traditional media or via new media outlets. In addition to expected entries covering the basics of theories and methods traditionally used in communication research, other entries discuss important trends influencing the future of that research, including contemporary practical issues students will face in communication professions, the influences of globalization on research, use of new recording technologies in fieldwork, and the challenges and opportunities related to studying online multi-media environments. Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program. Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats. Although organized A-to-Z, front matter includes a Reader's Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries. Back matter includes a Chronology of the development of the field of communication research; a Resource Guide to classic books, journals, and associations; a Glossary introducing the terminology of the field; and a detailed Index. Entries conclude with References/Further Readings and Cross-References to related entries to guide students further in their research journeys. The Index, Reader's Guide themes, and Cross-References combine to provide robust search-and-browse in the e-version.

*The Routledge International Handbook on Narrative and Life History* Oct 23 2019 In recent decades, there has been a substantial turn towards narrative and life history study. The embrace of narrative and life history work has accompanied the move to postmodernism and post-structuralism across a wide range of disciplines: sociological studies, gender studies, cultural studies, social history; literary theory; and, most recently, psychology. Written by leading international scholars from the main contributing perspectives and disciplines, *The Routledge International Handbook on Narrative and Life History* seeks to capture the range and scope as well as the considerable complexity of the field of narrative study and life history work by situating these fields of study within the historical and contemporary context. Topics covered include: • The historical emergences of life history and narrative study • Techniques for conducting life history and narrative study • Identity and politics • Generational history • Social and psycho-social approaches to narrative history With chapters from expert contributors, this volume will prove a comprehensive and authoritative resource to students, researchers and

educators interested in narrative theory, analysis and interpretation.

*An Applied Guide to Research Designs* Jan 06 2021 The Second Edition of *An Applied Guide to Research Designs* offers researchers in the social and behavioral sciences guidance for selecting the most appropriate research design to apply in their study. Using consistent terminology, the authors visually present a range of research designs used in quantitative, qualitative, and mixed methods to help readers conceptualize, construct, test, and problem solve in their investigation. The Second Edition features revamped and expanded coverage of research designs, new real-world examples and references, a new chapter on action research, and updated ancillaries.

*Narrative Environments and Experience Design* Oct 03 2020 This book argues narrative, people and place are inseparable and pursues the consequences of this insight through the design of narrative environments. This is a new and distinct area of practice that weaves together and extends narrative theory, spatial theory and design theory. Examples of narrative spaces, such as exhibitions, brand experiences, urban design and socially engaged participatory interventions in the public realm, are explored to show how space acts as a medium of communication through a synthesis of materials, structures and technologies, and how particular social behaviours are reproduced or critiqued through spatial narratives. This book will be of interest to scholars in design studies, urban studies, architecture, new materialism and design practitioners in the creative industries.

*Cinema of Choice* Jun 18 2019 Standard Hollywood narrative movies prescribe linear narratives that cue the viewer to expect predictable outcomes and adopt a closed state of mind. There are, however, a small number of movies that, through the presentation of alternate narrative paths, open the mind to thoughts of choice and possibility. Through the study of several key movies for which this concept is central, such as *Sliding Doors*, *Run Lola Run*, *Inglourious Basterds*, and *Rashomon*, Nitzan Ben Shaul examines the causes and implications of optional thinking and how these movies allow for more open and creative possibilities. This book examines the methods by which standard narrative movies close down thinking processes and deliver easy pleasures to the viewer whilst demonstrating that this is not the only possibility and that optional thinking can be both stimulating and rewarding.
