[Critical Code Studies](#) _____ Oct 29 2019 An argument that we must read code for more than what it does—we must consider what it means. Computer source code has become part of popular discourse. Code is read not only by programmers but by lawyers, artists, pundits, reporters, political activists, and literary scholars; it is used in political debate, works of art, popular entertainment, and historical accounts. In this book, Mark Marino argues that code means more than merely what it does; we must also consider what it means. We need to learn to read code critically. Marino presents a series of case studies—ranging from the Climategate scandal to a hactivist art project on the US-Mexico border—as lessons in critical code reading. Marino shows how, in the process of its circulation, the meaning of code changes beyond its functional role to include connotations and implications, opening it up to interpretation and inference—and misinterpretation and reappropriation. The Climategate controversy, for example, stemmed from a misreading of a bit of placeholder code as a “smoking gun” that supposedly proved fabrication of climate data. A poetry generator created by Nick Montfort was remixed and reimagined by other poets, and subject to literary interpretation. Each case study begins by presenting a small and self-contained passage of code—by coders as disparate as programming pioneer Grace Hopper and philosopher Friedrich Kittler—and an accessible explanation of its context and functioning. Marino then explores its extra-functional significance, demonstrating a variety of interpretive approaches.

Kinn's The Medical Assistant - E-Book May 17 2021 The most comprehensive medical assisting resource available, Kinn's The Medical Assistant, 11th Edition provides unparalleled coverage of the practical, real-world administrative and clinical skills essential to your success in health care. Kinn's 11th Edition combines current, reliable content with innovative support tools to deliver an engaging learning experience and help you confidently prepare for today's competitive job market. Study more effectively with detailed Learning Objectives, Vocabulary terms and definitions, and Connections icons that link important concepts in the text to corresponding exercises and activities throughout the companion Evolve Resources website and Study Guide & Procedure Checklist Manual. Apply what you learn to realistic administrative and clinical situations through an Applied Learning Approach that integrates case studies at the beginning and end of each chapter. Master key skills and clinical procedures through step-by-step instructions and full-color illustrations that clarify techniques. Confidently meet national medical assisting standards with clearly identified objectives and competencies incorporated throughout the text. Sharpen your analytical skills and test your understanding of key concepts with critical thinking exercises. Understand the importance of patient privacy with the information highlighted in helpful HIPAA boxes. Demonstrate your proficiency to potential employers with an interactive portfolio builder on the companion Evolve Resources website. Familiarize yourself with the latest administrative office trends and issues including the Electronic Health Record. Confidently prepare for certification exams with online practice exams and an online appendix that mirrors the exam outlines and provides fast, efficient access to related content. Enhance your value to employers with an essential understanding of emerging disciplines and growing specialty areas. Find information quickly and easily with newly reorganized chapter content and charting examples. Trap/See Code Users Manual for Predicting Trapped Radiation Environments Sep 28 2019
TRAP/SEE is a PC-based computer code with a user-friendly interface which predicts the ionizing radiation exposure of spacecraft having orbits in the Earth's trapped radiation belts. The code incorporates the standard AP8 and AE8 trapped proton and electron models but also allows application of an improved database interpolation method. The code treats low-Earth as well as highly-elliptical Earth orbits, taking into account trajectory perturbations due to gravitational forces from the Moon and Sun, atmospheric drag, and solar radiation pressure. Orbit-average spectra, peak spectra per orbit, and instantaneous spectra at points along the orbit trajectory are calculated. Described in this report are the features, models, model limitations and uncertainties, input and output descriptions, and example calculations and applications for the TRAP/SEE code. Armstrong, T. The Coding Manual for Qualitative Researchers May 29 2022 The Second Edition of Johnny Saldaña's international bestseller provides an in-depth guide to the multiple approaches available for coding qualitative data. Fully up to date, it includes new chapters, more coding techniques and an additional glossary. Clear, practical and authoritative, the book: -describes how coding initiates qualitative data analysis -demonstrates the writing of analytic memos -discusses available analytic software -suggests how best to use The Coding Manual for Qualitative Researchers for particular studies. In total, 32 coding methods are profiled that can be applied to a range of research genres from grounded theory to phenomenology to narrative inquiry. For each approach, Saldaña discusses the method's origins, a description of the method, practical applications, and a clearly illustrated example with analytic follow-up. A unique and invaluable reference for students, teachers, and practitioners of qualitative inquiry, this book is essential reading across the social sciences.
