Quantitative Techniques for Management Mar 20 2022 This book has been developed with a focus on the need to demystify the subject and make it easy for students to grasp the principles and details involved, and make it easily understandable to beginners exposed to the subject for the first time. An attempt has been made to explain things in a logical progression, in the simplest possible way so that neophytes may quickly grasp the concepts and methodology. A novel approach in the book is the illustrative use of computers with TORA package, as a problem-solving tool. In actual practice, situations arise with large and complex problems that are difficult to solve. At such times, using computers to solve problems gives fast and more accurate results. The chapters are arranged so as to progressively explain the workings of various models in actual practice through step-by-step procedures that so simplify and solve them, that even students from a non-mathematics academic background will grasp them quickly. Linear programming, the most powerful tool for managerial decision-making is covered elaborately, including thorough discussion of various LP methods and LP solutions, Duality in LP problems, sensitivity analysis, etc. Models in the book also use Linear Programming to reach solutions including those relating to transportation and transshipment, assignment, and Game Theory & illustrated with screen-shots of a computer with a TORA package. Readers whether students, business executives, managers, researchers and academicians will find that the insights and knowledge obtained from the book will stand them in good stead in both academic as well as occupational pursuits.

GMAT Critical Reasoning Dec 17 2021 "Learn how to identify question types, simplify arguments, and eliminate wrong answers efficiently and confidently. Practice the logic skills tested by the GMAT and master proven methods for solving all Critical Reasoning problems"--Page 4 of cover.

Nehru Dec 25 2019 From being elected as Congress president in 1929 till his death in 1964, Jawaharlal Nehru remained a towering figure in Indian politics, a man who left an indelible stamp on the history of South Asia. As a leading light of the nationalist struggle and as India's first and longest-serving prime minister, his ideas shaped the political contours of the country and left an imprint so deep that his legacy continues to be debated furiously today. In life, as in afterlife, Nehru was many things to many people. Going beyond the imposed labels of contemporary discourse, this book illuminates four encounters that Nehru had with contemporaries from across the political spectrum - Muhammad Iqbal, Muhammad Ali Jinnah, Sardar Patel and Syama Prasad Mookerjee - that are critical to understanding his ideas, and his long afterlife and impress on the present. Nehru may no longer be alive to answer his critics today, but there was a time when he pitted himself vigorously against his opponents in the marketplace of ideas, debating the most profound questions in South Asian history and decisively influencing political events. It is this intellectually combative Nehru whom we meet in this book - voicing ideological disagreements, forging political alliances, moulding political opinion, offering visions of the future and staking out the political field - a key figure in the debates that defined India
