Breeding Sorghum for Diverse End Uses Nov 06 2020 Breeding Sorghum for Diverse End Uses is a comprehensive overview of all significant global efforts for the genetic improvement of sorghum, a major crop of many semi-arid nations that is suitable for a huge range of uses, from human food, to biofuels. Split into two main sections, the book initially reviews the genetic suitability of sorghum for breeding, also providing the history of the genetic improvement of the grain. Finally, other sections look at specific breeding programs that could be improved in a number of areas, including human food, animal feed and industrial usage. Readers in academics, research, plant genetics and sorghum development will find this resource of great value. In addition, it is essential reading for engineers who utilize sorghum for food, feed and industrial materials in industry. Provides information on key advances in the genetic makeup of sorghum Allows plant breeders to apply this research to effectively breed new strains of sorghum that are dependent on final usage goals Includes the latest findings in each section to orient researchers to plans for future genetic enhancement

Assessing Multilingual Children Aug 03 2020 Second language learners often produce language forms resembling those of children with Specific Language Impairment (SLI). At present, professionals working in language assessment and education have only limited diagnostic instruments to distinguish language impaired migrant children from those who will eventually catch up with their monolingual peers. This book presents a comprehensive set of tools for assessing the linguistic abilities of bilingual children. It aims to disentangle effects of bilingualism from those of SLI, making use of both models of bilingualism and models of language impairment. The book's methods-oriented focus will make it an essential handbook for practitioners who look for measures which could be adapted to a variety of languages in diverse communities, as well as academic researchers.
