**Low Earth Orbit Satellite Design** Jun 30 2020 In recent decades, the number of satellites being built and launched into Earth's orbit has grown immensely, alongside the field of space engineering itself. This book offers an in-depth guide to engineers and professionals seeking to understand the technologies behind Low Earth Orbit satellites. With access to special spreadsheets that provide the key equations and relationships needed for mastering spacecraft design, this book gives the growing crop of space engineers and professionals the tools and resources they need to prepare their own LEO satellite designs, which is especially useful for designers of small satellites such as those launched by universities. Each chapter breaks down the various mathematics and principles underlying current spacecraft software and hardware designs.

Formation of Structure in the Universe Nov 23 2019 An up-to-date and comprehensive graduate-level textbook on the fast-moving subject of structure formation in cosmology, written by eleven world-leading authorities.

*Anatomy of a Short Story* Jun 11 2021 Since its first publication in 1948, one of Vladimir Nabokov's shortest short stories, "Signs and Symbols," has generated perhaps more interpretations and critical appraisal than any other that he wrote. It has been called "one of the greatest short stories ever written" and "a triumph of economy and force, minute realism and shimmering mystery" (Brian Boyd, Vladimir Nabokov: The American Years). *Anatomy of a Short Story* contains: • the full text of "Signs and Symbols," line numbered and referenced throughout • correspondence about the story, most of it never before published, between Nabokov and the editor of *The New Yorker*, where the story was first published • 33 essays of literary criticism, bringing together classic essays and new interpretations • a round-table discussion in which a screenwriter, a theater scholar, a mathematician, a psychiatrist, and a literary scholar bring their perspectives to bear on "Signs and Symbols" *Anatomy of a Short Story* illuminates the ways in which we interpret fiction, and the short story in particular.

*Spin Excitations in Nuclei* Apr 28 2020 This volume contains the proceedings of the "International Conference on Spin Excitations in Nuclei" held in Telluride, Colorado, March 25-27, 1982. The motivation for the conference was, in a large part due to the recent development of new variable energy accelerators which produce high quality beams of electrons, protons, and pions that are providing the first precise information on spin excitations in nuclei over a large range of spin and mass. In the past such data had been restricted primarily to light nuclei and were generally resolution limited. Perhaps, the most exciting new result has

been the clear observation of the elusive spin-dipole strength (Gamow Teller and M1) in medium and heavy mass nuclei through the use of the (p,n) and (p,p') reactions at or near zero degrees with 100-200 MeV incident protons. Energy dependence in the isovector parts of the nucleon-nucleon interaction make the 100-200 MeV energy region particularly appropriate for such studies. The clean data from (e,e'), (IT,IT'), (p,p'), and (p,n) on high spin "stretched" states which have particularly simple structure has also been quite important. The recent results contain important new information on the nature of the spin dependent forces in nuclei. These in turn are inherently related to the properties of the nuclear mesonic field and the underlying quantum chromodynamics.

**Introduction to Relativistic Heavy Ion Collisions** Dec 17 2021 Introduction to Relativistic Heavy Ion Collisions László P. Csernai University of Bergen, Norway Written for postgraduates and advanced undergraduates in physics, this clear and concise work covers a wide range of subjects from intermediate to ultra-relativistic energies, thus providing an introductory overview of heavy ion physics. The reader is introduced to essential principles in heavy ion physics through a variety of questions, with answers, of varying difficulty. This timely text is based on a series of well received lectures given by Professor L. Csernai at the University of Minnesota, and the University of Bergen, where the author is based.

**Enabling Process Management for Loosely Framed Knowledge-intensive Processes** Feb 07 2021 This book is a revised version of the PhD dissertation written by the author at the Department of Business Informatics and Operations Management at Ghent University in Belgium. It addresses shortcomings in Business Process Management concerning loosely framed knowledge-intensive processes, which are characterized by their numerous valid process variants and their reliance on knowledge workers to apply their knowledge to decide on a suitable process variant that fits the context of a specific process execution. The goal was to lay the foundation for a process-aware business process management (IT-)system to support such processes. Several proof-of-concept implementations have been made for the core components and were evaluated in the domain of the healthcare. Starting from an artificial, but realistic, case about patients that arrive in the emergency room with suspected arm fractures and later progressing to a case study of the diagnosis and treatment of patients in the emergency department of a real hospital, using data from their patient files. In 2020, the PhD dissertation won the "CAiSE PhD award", granted to outstanding PhD theses in the field of Information Systems Engineering.

**Soul Survivor** Feb 25 2020 This is the story of James Leininger, who-- a little more than two weeks after his second birthday-- began having blood-curdling

nightmares that just would not stop. When James began screaming out recurring phrases like, "Plane on fire! Little man can't get out!" the Leiningers finally admitted that they truly had to take notice. When details of planes and war tragedies no two-year-old boy could know continued-- even in stark daylight-- Bruce and Andrea Leininger began to realize that this was an incredible situation. *Soul Survivor* is the story of how the Leiningers pieced together what their son was communicating and eventually discovered that he was reliving the past life of World War II fighter pilot James Huston. As Bruce Leininger struggled to understand what was happening to his son, he also uncovered details of James Huston's life-- and death-- as a pilot that will fascinate military buffs everywhere. In *Soul Survivor*, we are taken for a gripping ride as the Leiningers' belief system is shaken to the core, and both of these families come to know a little boy who, against all odds and even in the face of true skeptics, harbors the soul of this man who died long ago.

*Wikipedia @ 20* May 30 2020 Wikipedia's first twenty years: how what began as an experiment in collaboration became the world's most popular reference work. We have been looking things up in Wikipedia for twenty years. What began almost by accident--a wiki attached to an nascent online encyclopedia--has become the world's most popular reference work. Regarded at first as the scholarly equivalent of a Big Mac, Wikipedia is now known for its reliable sourcing and as a bastion of (mostly) reasoned interaction. How has Wikipedia, built on a model of radical collaboration, remained true to its original mission of "free access to the sum of all human knowledge" when other tech phenomena have devolved into advertising platforms? In this book, scholars, activists, and volunteers reflect on Wikipedia's first twenty years, revealing connections across disciplines and borders, languages and data, the professional and personal.

**Pheromone** Dec 25 2019 Christopher Marley's graceful arrangements of jewel-like arthropods make converts of those who have long seen insects as creepy—these are stunning works of art. Marley's keen eye for design combines with his entomological education to produce mesmerizing, kaleidoscopic bug mandalas and striking up-close-and-personal single-insect portraits. Neither painted nor digitally enhanced, the artist's subjects appear in this book just as they would if you found one on your screen door. Each gorgeous creation is identified with its scientific and common names, and many are accompanied by concise descriptive text. In succinct essays, Marley writes about insect collecting and its benefits to the environment; he describes his creative process in choosing and arranging the creatures for optimal visual effect. After a childhood spent running from every creature that skittered about on more than four legs, Marley has devoted much of his adult life to studying bugs—with increasing fascination. He makes frequent forays to remote locations far removed from his home in

Oregon, seeking out the most beautiful and exotic species on Earth.

*Congressional Record* Jan 06 2021 The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. **The Chess Puzzle Book 4** Aug 25 2022 Welcome to The Chess Puzzle Book 4!

- It mostly deals with the important technical question of how to convert a static advantage. As noted by Mark Dvoretsky in his Foreword: "I cannot think of any books with high-quality exercises regarding such topics as domination, the - do not hurry" principle, the principle of two weaknesses, etc., all of which are discussed by Müller and his co-author Alexander Markgraf ... I hope that you enjoy this new book by Müller and Markgraf and I encourage you to seriously study the positions discussed in the book. As a result, you will significantly progress in your understanding of chess and improve your results." Topics include Prophylaxis, The Principle of Two Weaknesses, The Right Exchange, Domination, Do Not Rush, and Converting an Advantage. There are also many well-chosen exercises with comprehensive solutions to help guide and instruct the reader. The Chess Puzzle Book 4 is the fourth volume in the series formerly known as the ChessCafe Puzzle Books.

The Good Pub Guide: London and the South East Dec 05 2020 This handy portable guide features up-to-date information, including food, drinks, facilities and opening hours, for the best pubs in London and the south east of England, as chosen by the highly respected editors of the annual Good Pub Guide. **Topobiology** Oct 15 2021 If you had a complete copy of a dinosaur's DNA and

the genetic code, you still would not be able to make a dinosaur—or even determine what one looked like. Why? How do animals get their shape and how does shape evolve? In this important book, Nobel laureate Gerald M. Edelman challenges the notion that an understanding of the genetic code and of cell differentiation is sufficient to answer these questions. Rather, he argues, a trio of related issues must also be investigated—the development of form, the evolution of form, and the morphological and functional bases of behavior. Topobiology presents an introduction to molecular embryology and describes a comprehensive hypothesis to account for the evolution and development of animal form.

**The Good Pub Guide 2013** Aug 01 2020 Once again organized county by county, The Good Pub Guide is as invaluable as ever. After all, this is a special breed that deserves the very best!

**Thermodynamics of Minerals and Melts** Jan 18 2022 Today large numbers of geoscientists apply thermodynamic theory to solutions of a variety of problems in earth and planetary sciences. For most problems in chemistry, the application of thermodynamics is direct and rewarding. Geoscientists, however, deal with complex inorganic and organic substances. The complexities in the nature of mineralogical substances arise due to their involved crystal structure and multicomponential character. As a result, thermochemical solutions of many geological-planetological problems should be attempted only with a clear understanding of the crystal-chemical and thermochemical character of each mineral. The subject of physical geochemistry deals with the elucidation and application of physico-chemical principles to geosciences. Thermodynamics of mineral phases and crystalline solutions form an integral part of it. Developments in mineralogic thermodynamics in recent years have been very encouraging, but do not easily reach many geoscientists interested mainly in applications. This series is to provide geoscientists and planetary scientists with current information on the developments in thermodynamics of mineral systems, and also provide the active researcher in this rapidly developing field with a forum through which he can popularize the important conclusions of his work. In the first several volumes, we plan to publish original contributions (with an abundant supply of background material for the uninitiated reader) and thoughtful reviews from a number of researchers on mineralogic thermodynamics, on the application of thermochemistry to planetary phase equilibria (including meteorites), and on kinetics of geochemical reactions.

*Social Media and Political Accountability* Jul 12 2021 This book illustrates how social media platforms enable us to understand everyday politics and evaluates the extent to which they can foster accountability, transparency and responsiveness. The first part focuses on accountability and tests whether the offline behavior of politicians is consistent with their online declarations, showing

that textual analysis of politicians' messages is useful to explain phenomena such as endorsements, party splits and appointments to cabinet. The second part concerns responsiveness. By means of sentiment analysis, it investigates the shape of the interaction between citizens and politicians determining whether politicians' behavior is influenced by the pressure exerted on social media both on policy and non-policy issues. Finally, the book evaluates whether a responsive behavior is successful in restoring online political trust, narrowing the gap between voters and political elites. The book will be of use to students, scholars and practitioners interested in party organization, intra-party politics, legislative politics, social media analysis and political communication, as well as politicians themselves.

Contract as Promise Mar 20 2022 *Contract as Promise* is a study of the philosophical foundations of contract law in which Professor Fried effectively answers some of the most common assumptions about contract law and strongly proposes a moral basis for it while defending the classical theory of contract. This book provides two purposes regarding the complex legal institution of the contract. The first is the theoretical purpose to demonstrate how contract law can be traced to and is determined by a small number of basic moral principles. At the theory level the author shows that contract law does have an underlying, and unifying structure. The second is a pedagogic purpose to provide for students the underlying structure of contract law. At this level of doctrinal exposition the author shows that structure can be referred to moral principles. Together the two purposes support each other in an effective and comprehensive study of contract law. This second edition retains the original text, and includes a new Preface. It also includes a substantial new essay entitled *Contract as Promise in the Light of Subsequent Scholarship--Especially Law and Economics* which serves as a retrospective of the work accomplished in the last thirty years, while responding to present and future work in the field.

**The Dream of the Great American Novel** Sep 26 2022 The first book in many years to take in the full sweep of national fiction, *The Dream of the Great American Novel* explains why this supposedly antiquated idea continues to thrive. It shows that four G.A.N. "scripts" are keys to the dynamics of American literature and identity--and to the myth of a nation perpetually under construction.

*The Queen of All Poisons* Oct 27 2022 A Boston physician becomes an assassin for the U.S. government in this medical suspense thriller by an award-winning pathologist. "Hidden under a cloak of legitimacy, I have been pressed to deliver extraordinary service for my country. It has been a successful ruse. A premium blend of dark deception with just an aroma of truth."—Dr. Lily Robinson Dr. Lily Robinson is a brilliant physician with an encyclopedic knowledge of all toxins and poisons...and a penchant for stilettos. Then in a sudden twist, the United States government appeals to her patriotism—and her knowledge of how to kill without bloodshed—to rid the world of threats to our nation. Emotionally blunted and flawed, she struggles to move between assassin and healer, yet still able to fulfill her competing objectives. Now asked to assassinate a terrorist threatening New York City, she quickly realizes the Russians have already released a deadly toxin in a surprisingly innocuous medium.
